Family Farms: Survival and Prospect Harold Brookfield,Helen Parsons,2007-11-08 Marx Lenin and Kautsky all regarded family farming as doomed to be split into capitalist farms and proletarian labour Most modern economists regard family farming as an archaic form of production organization destined to give way to agribusiness Family Farms refutes these notions and analyses the manner in which family farmers have been able to operate with success in both developed and developing countries using examples wherever these are illuminating This book begins by reviewing theoretical arguments about agricultural structures and defines family farming This is followed by five vignettes about farming in the first half of the twentieth century The authors analyse the conditions of access to land and water labour livestock tools and seed and review marketing arrangements and how they have changed since 1900 A three chapter review of evolving policies in the North Atlantic countries in the communist states and in the developing countries leads to a discussion of the impact of neo liberalism New issues of the farmer as steward of the environment are explored as well as modern ideas about de agrarianization and a discussion of land reform tracing the experience of Mexico and Brazil In two final chapters the more positive approach of pluriactivity is discussed and followed by a review of organic farming as a principal modern innovation New political organizations representing family farming are described and their demands are discussed with empathy but in a sceptical manner Family farming is an adaptable and resilient form of production organization and these qualities have allowed it to survive The future will be no easier than the past yet family farming continues to flourish in most contexts This book will be useful for researchers students and lecturers interested in Development Studies Rural Studies and Geography and Anthropology as well as general readers who have an interest in farming Family Studies Anuja Agrawal,2024-10-31 Within the social political and economic contexts existing in modern day India family is neither a simple remnant of tradition nor a domain merely representing insulated private lives Rather it is implicated in malleable yet overpowering structures relationships and practices If the family is a crucial site of ideological and imaginative investments playing a critical role in reproducing and defining contemporary selves and societies families are responsive to and constrained by the complex

dynamics in which they are enmeshed Family relationships remain fundamental to survival and security even as policy and legislative imperatives as well as reproductive and communication technologies play a crucial role in reshaping them Critically interrogating the extant approaches to and concepts within the study of family Family Studies brings together diverse contributions by scholars from varied backgrounds to focus upon issues central to the conceptualization of family and their implications for Indian society The chapters in this volume make a strong case for why family as an ideological construct and families as a multitude of lived relationships should continue to be subjects of critical social scientific attention

**Family Life and Family Policies in Europe** Franz-Xaver Kaufmann, 2002 This volume is a comparative study of family change in Europe and its dependency on social policy regimes The authors explore family discourse family law single parents gender relations the new fathers divorce and abortion within the framework of national policies vis a vis the family Conventional wisdom assumes that policy decisions affecting the life situation of a population shape different opportunities for private living particularly in relation to children and the family But the authors argue it would be too simplistic to assume a direct causal link between welfare policies for the family and developments in the family sector Family change is in fact mediated by institutional factors as well as by cultural traditions and political intervention The chapters in this volume deal with the substantial and methodological problems of ascertaining the impact of different national policy regimes on family change
