 international community pronounced prenatal sex selection via abortion an act of violence against women and unethical At  
 the same time new developments in reproductive technology in the United States led to a method of sex selection before  
 conception its US inventor marketed the practice as family balancing and defended it with the rhetoric of freedom of choice  
 In *Gender before Birth* Rajani Bhatia takes on the double standard of how similar practices in the West and non West are  
 divergently named and framed Bhatia s extensive fieldwork includes interviews with clinicians scientists biomedical service  
 providers and feminist activists and her resulting analysis extends both feminist theory on reproduction and feminist science  
 and technology studies She argues that we are at the beginning of a changing transnational terrain that presents new  
 challenges to theorized inequality in reproduction demonstrating how the technosciences often get embroiled in colonial  
 gender and racial politics      Darkness at Noon Ashish Bose, 2003
