Birkhead, Anders Pape Møller, 1998-08-12 Sperm Competition and Sexual Selection presents the intricate ways in which sperm compete to fertilize eggs and how this has prompted reinterpretations of breeding behavior This book provides a theoretical framework for the study of sperm competition which is a central part of sexual selection It also discusses the roles of females and the relationships between paternal care in sperm competition The chapters focusing on taxonomic development are diverse and cover all the major animal groups both vertebrate and invertebrate and plants The final chapter provides an overview discussing the relationship between sperm competition and sexual selection in terms of both function and mechanism and how these translate into species fitness This book will be of prime interest to behaviorists ecologists and evolutionary biologists suggesting new avenues of research and new ways of approaching old problems The only up to date summary of a central and popular subject Well known editors and authors Provides a theoretical framework for the study of sperm competition Covers all major animal groups Includes a chapter on plants **Biodiversity**

Conservation in Costa Rica Gordon W. Frankie, Alfonso Mata, S. Bradleigh Vinson, 2025-03-21 The beautiful tropical dry forest of northwest Costa Rica with its highly seasonal rainfall and diversely vegetated landscape is disappearing even more rapidly than Costa Rica's better known rain forest primarily because it has been easier to convert to agriculture This book based on more than thirty years of study offers the first comprehensive look at the ecology biodiversity and conservation status of this endangered and fragile region The contributors from Costa Rica Britain Mexico and the United States and representing the fields of ecology environmental education policy and the law examine the major plant and animal groups living in the dry forest and present the first technical evaluation of Costa Rica's conservation efforts As they assess the status of their area of specialty in the dry forest the contributors also look beyond this particular region to show how its plants and animals are ecologically and evolutionarily connected to other geographic areas in Costa Rica and Central America Their chapters cover topics such as watershed and coastal management plant phenology pollination insects birds mammals amphibians and reptiles They also consider the socioeconomic policy legal and political aspects of biodiversity conservation giving the volume a wide ranging perspective and making a unique contribution to our knowledge of the tropical dry forest The book concludes with an important synthesis of the contributors recommendations on future directions policies and actions that will better conserve biodiversity in Costa Rica and other neotropical forests as well This title is part of UC Press's Voices Revived program which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice reach and impact Drawing on a backlist dating to 1893 Voices Revived makes high quality peer reviewed scholarship accessible once again using print on demand technology This title was originally published in 2005 *Reptile Ecology and Conservation* C. Kenneth Dodd Jr., 2016-05-05 This practical handbook of reptile field ecology and conservation brings together a distinguished international group of reptile researchers to provide a state of the

art review of the many new and exciting techniques used to study reptiles The authors describe ecological sampling techniques and how they are implemented to monitor the conservation status and population trends of snakes lizards tuatara turtles and crocodilians throughout the world Emphasis is placed on the extent of statistical inference and the biases associated with different techniques and analyses The chapters focus on the application of field research and data analysis for achieving an understanding of reptile life history population dynamics movement patterns thermal ecology conservation status and the relationship between reptiles and their environment The book emphasises the need for thorough planning and demonstrates how a multi dimensional approach incorporates information related to morphology genetics molecular biology epidemiology statistical modelling animal welfare and biosecurity Although accentuating field sampling sections on experimental applications in laboratories and zoos thermal ecology genetics landscape ecology disease and biosecurity and management options are included Much of this information is scattered in the scientific literature or not readily available and the intention is to provide an affordable comprehensive synthesis for use by graduate students researchers and practising conservationists worldwide

Vertebrate Reproduction Volker Blüm, 2012-12-06 Oral birth in the Australian gastric brooding frog *Rheobatrachus sUus* 2 Preface I have deliberately chosen the title picture to the preface which shows the oral birth of a young gastric brooding frog *Rheobatrachus situs* to draw the reader's attention to the preface since I wish to explain why the book was written and illustrated in the way it now appears The book has grown out of the material of a lecture course taking 3 to 4 hours per week each semester that I have given for several years at the Ruhr University Bochum as the theoretical basis for an intensive 4 week practical course on vertebrate reproduction for students of biology For various reasons I am a hardened opponent of giving lecture notes to the students On the other hand I found that my students made great efforts to work through and supplement their own lecture notes by studying the literature However there are no suitable textbooks on vertebrate reproduction written in German and the standard work in this field is now several decades old and deals mainly with mammals The students were therefore often frustrated in their efforts given the limited time they had available I have therefore decided to present here the most important structural and functional aspects of vertebrate reproduction and include other material to extend the framework of my original lectures
