Reproductive Physiology in Clinical Practice Daniel H. Riddick, 1987 Reproductive Physiology in Clinical Practice Daniel H. Riddick, 1987 **Oncofertility Medical Practice** Clarisa Gracia, Teresa K Woodruff, 2012-07-11 Oncofertility is a specialty that bridges the disciplines of reproductive endocrinology and infertility and oncology with the goal of expanding the reproductive options of cancer patients. Given fertility risks associated with specific cancer treatments as well as the improved long term survival made possible by these therapies, there has been growing interest in expanding reproductive options for cancer patients. Indeed, both cancer survivors and the medical community have acknowledged the importance of patient counseling and the pursuit of fertility preservation options prior to starting cancer treatment. *Oncofertility Medical Practice: Clinical Issues and Implementation* is the third in a series of timely and indispensable books on fertility preservation for cancer patients: the first one focused on advances in basic science research and the second one offered ethical, legal, and social perspectives on the theme. This book elucidates the latest practices and emerging treatments in oncofertility and provides necessary information on the successes, risks, and limitations of fertility preserving technologies. Authoritative and insightful, written by an impressive multi-disciplinary cadre of specialists, this book is a valuable up-to-date resource for all those practicing in this demanding field. This excellent text is an invaluable resource and a must-read for clinicians and researchers interested in Oncofertility. The editors and authors need to be congratulated for their fine work. Roger A Lobo MD, Professor of Obstetrics and Gynecology, Columbia University and Past President of the American Society for Reproductive Medicine.
