Reproductive Processes And Contraception:

Reproductive Processes and Contraception Kenneth W. McKerns, 2013-03-13 This monograph represents the eighth sponsored by the International Society for Biochemical Endocrinology The topics should be of interest to basic research scientists medical practitioners and students of reproductive biology It complements our monograph published in 1979 on Structure and Function of the Gonadotropins The monograph is organized in ten topic areas relative to the general theme of reproduction and contraception There are several chapters in each area Obviously all aspects of each area could not be covered An attempt was made to seek interesting basic research ideas and concepts that might in the future be applicable to fertility regulation The topics are interactions in gonadotropin regulation GnRH analogues as contraceptive agents receptors in cellular localization of hormones uterine and mammary receptors germ cell regulation and secretory proteins control mechanisms and metabolic regulations hCG peptides and anti sera as antifertility agents iutization oocyte maturation and early pregnancy steroids and cell growth and finally prostaglandins and cell function The studies encompass many disciplines and techniques in anatomy physiology biochemistry and endocrinology in animals and humans both in vitro and in vivo A conference of contributors was held in Maine at the Asticou Inn in Northeast Harbor during the week of September 9-13 1979 The chapters as written for the monograph were presented for discussion by the participants who were selected for their knowledge of and contributions to this area of scientific investigation *Reproductive Processes and Contraception* 3Island Press, 1981-07-31 *Immunological Approaches to Contraception and Promotion of Fertility* Gursaran Talwar, 2013-03-09 Contraceptive research has entered the new age of vaccines Realistic prospects exist for the development of an entirely new battery of vaccines for use in human and veterinary medicine Among them may be anti fertility vaccines based on physiological mechanisms applicable to either the female or male This volume is a comprehensive review a status report of the subjects including fundamental work on the search for useful epitopes and ranging to applied vaccinology One vaccine to prevent pregnancy for use by women has already been studied extensively G P Talwar the volume's editor and his colleagues in New Delhi India published in 1976 a landmark series of papers describing the immunological properties of a preparation consisting of the alum precipitated beta subunit of human chorionic gonadotropin hCG chemically linked to tetanus toxoid The principle of enhancing antigenicity of a self protein by linkage of the epitope to a carrier protein was employed and tested clinically These trials carried out under the auspices of the Indian Council for Medical Research were the first application of the carrier protein concept for a vaccine for human use The encouraging results stimulated a wave of research not only on the use of hCG based vaccines but on other antigens as well **Science of Caring**, 1993 **Progress in Hormone Biochemistry and Pharmacology** M. Briggs, A. Corbin, 2012-12-06 Somatostatin was discovered in 1971 by Guillemin and his colleagues during their search for the hypothalamic growth hormone releasing factor A peptide was found in ovine hypothalamus which inhibited the release of growth hormone from cultured anterior pituitary cells 1 2

Determination 3 of its amino acid sequence indicated that it was a tetradecapeptide with a molecular weight of 1639 Figure 1J An identical peptide was later isolated from porcine hypothalamus by Schally and his coworkers 4 The peptide was named somatostatin in the belief that it was a hypothalamic releasing factor whose sole function was to inhibit the secretion of growth hormone It soon became evident however that a peptide with identical immunologic characteristics and biologic activity was present in the D cells of pancreatic islets in D like cells of the gastrointestinal tract in parafollicular cells of the thyroid gland and in extrahypo thalamic neurons of both the central and peripheral nervous system in various species including man Moreover studies employing synthetic somatostatin⁵ demonstrated that the peptide possessed a wide spectrum of biologic activities in addition to its inhibition of growth hormone

The Body Lisa Jean Moore, Monica Casper, 2014-11-06 This college level handbook offers a comprehensive and accessible overview of sociological and cultural perspectives on the human body Organized along the lines of a standard anatomical textbook delineated by body parts and processes this volume subverts the expected content in favor of providing tools for social and cultural analysis Students will learn about the human body in its social cultural and political contexts with emphasis on multiple contested meanings of the body body parts and systems Case studies examples and discussion questions are both US based and international Advancing critical body studies the book explicitly discusses bodies in relation to race class gender sexuality ability age health geography and citizenship status The framing is sociological rather than biomedical attentive to cultural meanings institutional practices politics and social problems The authors use commonly understood anatomical frames to discuss social cultural political and ethical issues concerning embodiment

Gynaecology by Ten Teachers Louise C Kenny, Helen Bickerstaff, 2017-05-08 First published in 1919 as Diseases of Women Gynaecology by Ten Teachers is well established as a concise yet comprehensive guide The twentieth edition has been thoroughly updated by a new team of teachers integrating clinical material with the latest scientific developments that underpin patient care Each chapter is highly structured with learning objectives definitions aetiology clinical features investigations treatments case histories and key point summaries and additional reading where appropriate New themes for this edition include professionalism and global health and information specific to both areas is threaded throughout the text

Assisted Conception: Research, Ethics and Law Jennifer Gunning, 2017-11-01 This title was first published in 2003 Assisted conception is an area where it often seems that all the ethical and legal issues have been covered and then technology advances and the discussions start all over again The book is an anthology of papers presented during a project looking at thearaputic research in assisted conception TRAC It is divided into three areas addressing research ethics and law Each chapter begins with an overview of the issues with the aim being to present new perspectives

rather than covering old ground The European Convention on Human rights and Biomedicine came into force on December 1 1999 The Convention allows thearaputic research and research on spare embryos but forbid fundamental research which may be essential to the safe development of new techniques This also means that people may become part of an experimental process without their consent The project brings together clinicians embryologists lawyers and ethicists to ascertain whether there might be a risk of infertility patients being exposed to insufficiently tested procedures and to see if there is a need for fundamental research in this area It also looks at the legislative safeguards that exist and whether a European standard for treatment should be set
