Levy, 2005      **The Infertility Trap**

R. John Aitken, 2022-05-05 A potential crisis in human fertility is brewing As societies become more affluent they experience changes that have a dramatic impact on reproduction As average family sizes fall the selection pressure for high fertility genes decreases exacerbated by the IVF industry which allows infertility linked genes to pass into the next generation Male fertility rates are low for many reasons including genetics and exposure to environmental toxins So a perfect storm of factors is contriving to drive fertility rates down at unprecedented rates If we do not recognize the reality of our situation and react accordingly an uncontrollable decline in population numbers is likely which we ll be unable to reverse This book will address in a unique and multi faceted way how the consequences of modern life affects fertility so that we can consider behavioural social medical and environmental changes which could reduce the severity of what is about to come     *Physiology and Toxicology of Male Reproduction* James C. Lamb, Paul M. D. Foster, 2013-10-22 Physiology and Toxicology of Male Reproduction is a collection of papers that deals with general reproductive biology and specific aspects of reproductive toxicology pertaining to the male sex Some papers discuss testicular organization reproductive toxicity testing systems and germ cell genetic toxicology The use of in vitro systems by investigators to dissect the male reproductive toxicants can lead to a more scientific approach toward hazard assessment and the development of safer drugs and chemicals Other papers explain the fundamental reproductive biology of the testis the neuroendocrine system the epididymis and accessory sex organs and spermatozoal evaluation Toxicological aspects cover the toxicological evaluation of the complete reproductive system testicular morphology sperm assessment and germ cell mutagenesis One paper describes alternative methods in toxicology by using new in vitro systems that should reduce or eliminate the need for tests conducted on animals In vitro methodology embraces other systems such as from subcellular fractions to isolated intact organs In relation to target organ toxicity the researcher can focus using primary cell cultures This collection will prove helpful to toxicologists graduate students and researchers in biology particularly in male reproductive toxicology and fertility testing     *Infertility, Medical and Social Choices* ,1988 Policy issues and option for congressional action Introduction Demographic of infertility factors contributing to infertility Prevention of Infertility Diagnosis of Infertility Treatment of Infertility Infertility services and cost Quality assurance for research and clinical care Reproductive health of veterans Ethical onsiderations Constitutional considerations Legal considerations artificial insemination in vitro fertilization embryo transfer and gamete intrafallopian transfer Legal consideration surrogate motherhood Frontiers of reproductive technology     **Infertility in the Modern World** Gillian R.
