Crocodile such as birds and mammals are a separate class, which have been derived from reptiles. Ramin Amirmardfar,2019-09 I have found this matter for the first time that Crocodiles are not a reptile Crocodile such as birds and mammals are a separate class which have been derived from reptiles Mammalian four chambered heart from a reptile like three chambered heart is extension of the septum the wall dividing the chambers lost of the right systemic arch and the left systemic arch persists In birds lost of the left systemic arch and the right systemic arch persist The lineage leading to crocodiles evolved a four chambered heart along a different pathway keeping both systemic arches Zoologists putting the land vertebrates in 4 classes amphibians reptiles birds and mammals But I came to the conclusion that their crocodile are a separate class As birds and mammals with obtaining four chambered heart have been derived from the class of reptiles and create a separate class Crocodile also have made four chambered hearts and create a new class and has been derived from the reptile class **Geology, Physical and Historical** Herdman Fitzgerald Cleland,1916 *Past, present, and future, a*

Christopher Lever,2003 This book describes how the various alien reptiles and amphibians now living in the wild throughout the world were first introduced how they subsequently became naturalized their present distribution and status in those countries to which they were introduced and their ecological and socio economic impact if any on the native biota and local economies Many species have had a more or less neutral impact being neither beneficial nor harmful However several have

had a positive ecological or socio economic impact while some such as the cane toad have had an extremely destructive effect The criteria for inclusion of a species are that it should have been imported from its natural range to a new country by human agency either accidentally or deliberately and that it should currently be established in the wild in self maintaining and self perpetuating populations unsupported by and independent of mankind **Popular Science Monthly and World Advance**
