cultural economic and religious agendas that drove the various and often conflicting curricula and contrasting visions of what good citizenship entails Mark Garrett Longaker argues that higher education more than 200 years ago allowed actors with differing political and economic interests to wrestle over the fate of American citizenship Then as today there was widespread agreement that civic training was essential in higher education but there were also sharp differences in the various visions of what proper republic citizenship entailed and how to prepare for it Longaker studies in detail the specific trends in rhetorical education offered at various early institutions such as Yale Columbia Pennsylvania and William and Mary with analyses of student lecture notes classroom activities disputation exercises reading lists lecture outlines and literary society records These documents reveal an extraordinary range of economic and philosophical interests and allegiances agrarian commercial spiritual communal and belletristic specific to each institution The findings challenge and complicate a widely held belief that early American civic education occurred in a halcyon era of united democratic republicanism Recognition that there are multiple ways to practice democratic citizenship and to enact democratic discourse historically as well as today best serves the goal of civic education Longaker argues *Rhetoric and the Republic* illuminates an important historical moment in the history of American education and dramatically highlights rhetorical education as a key site in the construction of democracy

borders and between languages as enabled by the new technology of print Sites of exchange were located not only in distant and unfamiliar lands but also in the bookseller's shop and the scholar's study The volume also explores the productive and complex dialogues between early modern culture and the classical past The types of exchanges discussed include the linguistic transactions of translation and imitation interactions between cultural elites such as monarchs courtiers and diplomats and the catalytic influences of particularly mobile or outward looking individuals and groups Ranging from the neo Latin poetry of an English author to the plays of a nun in seventeenth century New Spain from royal portraits exchanged in diplomatic negotiations to travelling companions in the Ottoman Empire the volume sheds new light
