Research And Change In Urban Community Health:

Research and Change in Urban Community Health Nigel Bruce,1995-01-01 This text reviews the background to the current interest in urban community health development and the rationale for examining the relationship between appropriate research methods and ways of bringing about informed change Within the health policy sector there is a great deal of activity worldwide based on the WHO s Healthy Cities movement which involves cities and communities throughout the developed world and increasingly in many developing countries as well This text is a reflection of the growing recognition that health environment and socio economic circumstances are inextricably linked and that a co ordinated and common approach is required *Healthy Cities and Urban Policy Research* Takehito Takano,2003-10-09 This is the first academic work to combine public health with urban planning *The Social Significance of Health Promotion* Theodore Harney MacDonald,2003 The Social Significance of Health Promotion sets out the long and fertile history of health promotion and delineates its contemporary role It explores the potential of health promotion to impact on our social values and sense of community *Transforming Research Methods in the Social Sciences* Angelo Flynn,Sherianne Kramer,2019-03-01 A look at the research methods in development across the global South Social science researchers in the global South and in South Africa particularly utilise research methods in innovative ways in order to respond to contexts characterised by diversity racial and political tensions socioeconomic disparities and gender inequalities These methods often remain undocumented a gap that this book starts to address Written by experts from various methodological fields Transforming Research Methods in the Social Sciences is a comprehensive collation of original essays and cutting edge research that demonstrates the variety of novel techniques and research methods available to researchers responding to these context bound issues It is particularly relevant for study and research in the fields of applied psychology sociology ethnography biography and anthropology In addition to their unique combination of conceptual and application issues the chapters also include discussions on ethical considerations relevant to the method in similar global South contexts Transforming Research Methods in the Social Sciences has much to offer to researchers professionals and others involved in social science research both locally and internationally Urban Public Health Gina S. Lovasi,Ana V. Diez Roux,Jennifer Kolker,2020-09-10 Today we know cities as shared spaces with the potential to both threaten and promote human health while urban areas are known to amplify the transmission of epidemics like Ebola urban residency is also associated with longer healthier lives Modern cities encompass a wide ecology of infrastructures institutions and services that impact health from access to improved sanitation and early childhood education to the design of buildings and transportation systems So how has this centuries long transformation in human settlement affected the mindset surrounding public health research and practice Urban Public Health is an interdisciplinary collaboration from experts across the globe that approaches the issue of urban health research from a uniquely public health orientation The carefully crafted and thoughtful chapters in this volume grapple with the complexity of

the urban setting as a physical and social space while also providing an abundance of global and local examples of current urban health practices Urban Public Health is divided into four pragmatic sections which cover core conceptual models of public health and their inequities methods of urban health research assessment methods of urban health research analysis and explanation and ultimately opportunities for urban health research to inform action through partnership and collaboration including those which elevate community voices and capacities An accessible guide for both students and researchers alike Urban Public Health shines a light on how to understand measure and change the urban setting so that cities grow people thrive and no one is left behind

The Routledge Handbook of Urbanization and Global Environmental Change Karen Seto, William Solecki, Corrie Griffith, 2015-12-22 This volume provides a comprehensive overview of the interactions and feedbacks between urbanization and global environmental change A key focus is the examination of how urbanization influences global environmental change and how global environmental change in turn influences urbanization processes It has four thematic foci Theme 1 addresses the pathways through which urbanization drives global environmental change Theme 2 addresses the pathways through which global environmental change affects the urban system Theme 3 addresses the interactions and responses within the urban system in response to global environmental change Theme 4 centers on critical emerging research

A Changing Environment for Human Security Linda Sygna, Karen O'Brien, Johanna Wolf, 2013-06-26 Environmental change presents a new context and new opportunities for transformational change This timely book will inspire new ways of understanding the relationship between environmental change and human security A Changing Environment for Human Security Transformative Approaches to Research Policy and Action both supports and informs a call for new transformative approaches to research policy and action The chapters in this book include critical analyses case studies and reflections on contemporary environmental and social challenges with a strong emphasis on those related to climate change Human thoughts and actions have contributed to an environment of insecurity manifested as multiple interacting threats that now represent a serious challenge to humanity Yet humans also have the capacity to collectively transform the economic political social and cultural systems and structures that perpetuate human insecurities These fresh perspectives on global environmental change from an interdisciplinary group of international experts will inspire readers whether students researchers policy makers or practitioners to think differently about environmental issues and sustainability The contributions show that in a changing environment human security is not only a possibility but a choice

Delmelle, 2016-03-09 Presenting current research on spatial epidemiology this book covers topics such as exposure chronic disease infectious disease accessibility to health care settings and new methods in Geographical Information Science and

Systems For epidemiologists and for the management and administration of health care settings it is critical to understand the spatial dynamics of disease For instance it is crucial that hospital administrators develop an understanding of the flow of patients over time especially during an outbreak of a particular disease so they can plan for appropriate levels of staffing and to carry out adaptive prevention measures Furthermore understanding where and why a disease occurs at a certain geographic location is vital for decision makers to formulate policy to increase the accessibility to health services either by prevention or adding new facilities Spatial epidemiology relies increasingly on new methodologies such as clustering algorithms visualization and space time modelling the domain of Geographic Information Science Implementation of those techniques appears at an increasing pace in commercial Geographic Information Systems alongside more traditional techniques that are already part of such systems This book provides the latest methods in GI Science and their use in health related problems

The Sustainable City IX N. Marchettini,C.A. Brebbia,R. Pulselli,S. Bastianoni,2014-09-23 Containing the proceedings of the 9th International Conference on Urban Regeneration and Sustainability this book addresses the multi disciplinary aspects of urban planning a result of the increasing size of cities the amount of resources and services required and the complexity of modern society Most of earth s population now lives in cities and the process of urbanisation still continues generating many problems deriving from the drift of the population towards them These problems can be resolved by cities becoming efficient habitats saving resources in a way that improves the quality and standard of living The process however faces a number of major challenges related to reducing pollution improving main transportation and infrastructure systems New urban solutions are required to optimise the use of space and energy resources leading to improvements in the environment i e reduction in air water and soil pollution as well as efficient ways to deal with waste generation These challenges contribute to the development of social and economic imbalances and require the development of new solutions Large cities are probably the most complex mechanisms to manage However despite such complexity they represent a fertile ground for architects engineers city planners social and political scientists and other professionals able to conceive new ideas and time them according to technological advances and human requirements The challenge of planning sustainable cities lies in considering their dynamics the exchange of energy and matter and the function and maintenance of ordered structures directly or indirectly supplied and maintained by natural systems Topics covered include Urban strategies Planning development and management Urban conservation and regeneration The community and the city Eco town planning Landscape planning and design Environmental management Sustainable energy and the city Transportation Quality of life Waterfront development Case studies Architectural issues Cultural heritage issues Intelligent environment and emerging technologies Planning for risk Disaster and emergency response Safety and security Waste management Infrastructure and society Urban metabolism
