The World of Biology and Politics Steven A. Peterson, Albert Somit, 2013-10-10 This volume describes a the present academic and institutional status of Biopolitics and b the wide range of research areas that have emerged within the field

Biology and Politics Albert Somit, Steven A. Peterson, 2011-03-25 Examines the research in the study of biology and politics This book explores the linkage between evolution genetics and politics with initial chapters on abandoned baby legislation a model of action and norms and the biopolitics of primates It also features chapters on how to use neuroimaging techniques to study political behaviour

Politics and the Life Sciences Robert H. Blank, Samuel M. Hines Jr., Odelia Funke, Joseph Losco, Patrick Stewart, 2014-10-21 This book examines the development of biopolitics as an academic perspective within political science It reviews the work of the leading proponents of this perspective and presents a comprehensive view of biopolitics as a framework to structure political inquiry

Biopolitics Albert Somit, Steven A. Peterson, 2012-05-14 This volume explores the linkage of the life sciences with policy biopolitics It features two points of departure the implications of the neurosciences for public policy and the implications of evolutionary theory for policy making It includes several case studies of how these points of departure inform our knowledge of policy

Biology and Political Science Robert Blank, Samuel M. Hines Jnr., 2002-03-11 This book demonstrates the increasing interest of some social scientists in the theories research and findings of life sciences in building a more interdisciplinary approach to the study of politics It discusses the development of biopolitics as an academic perspective within political science reviews the growing literature in the field and presents a coherent view of biopolitics as a framework for structuring inquiry across the current subfields of political science

Darwin and International Relations Bradley A. Thayer, 2021-03-17 Shows a mastery of research and theory in both biology and international relations and weaves the two fields together in a compelling fashion Dr Steven A Peterson Director School of Public Affairs Penn State Pathbreaking and controversial Darwin and International Relations offers the first comprehensive analysis of international affairs of state through the lens of evolutionary theory Using ethnological and statistical studies of warfare among tribal societies Bradley A Thayer argues that humans wage war for reasons predicted by evolutionary theory to gain and protect vital resources but also for the physically and emotionally stimulating effects of combat Thayer demonstrates that an evolutionary understanding of disease will become a more important part of the study of international relations as new strains of diseases emerge and advances in genetics make biological warfare a more effective weapon for states and terrorists He also explains the deep causes of ethnic conflict by illuminating how xenophobia and ethnocentrism evolved in humans He notes that these behaviors once contributed to our ancestors success in radically different environments but they remain a part of us Darwin and International Relations makes a major contribution to our understanding of human history and the future of international relations Obligatory reading for social and life scientists alike and deserves to become a standard work in political science International History Review A

thoughtful book that can challenge some of our comfortable assumptions *Journal of Military History* Outstanding This book will become a standard work in political science Roger D Masters Dartmouth College Democratization Tatu Vanhanen,2004-02-24 This book examines the relationship between indicators of resource distribution and democratization in the group of 170 countries with data ranging from the 1850s to the present day Vanhanen constructs a compelling argument concluding that the emergence of democracy is closely linked to resource distribution Handbook of Biology and Politics Steven A. Peterson,Albert Somit,2017-05-26 The study of biology and politics or biopolitics has gained considerable currency in recent years as articles on the subject have appeared in mainstream journals and books on the subject have been well received The literature has increased greatly since the 1960s and 1970s when this specialization first made an appearance This volume assesses the contributions of biology to political science Chapters focus on general biological approaches to politics biopolitical contributions to mainstream areas within political science and linkages between biology and public policy The volume provides readers with a comprehensive introduction to the subject *forum for inter-american research Vol 3* Wilfried Raussert,2023-07-20 Volume 3 of 6 of the complete premium print version of journal forum for inter american research fiar which is the official electronic journal of the International Association of Inter American Studies IAS fiar was established by the American Studies Program at Bielefeld University in 2008 We foster a dialogic and interdisciplinary approach to the study of the Americas fiar is a peer reviewed online journal Articles in this journal undergo a double blind review process and are published in English French Portuguese and Spanish **After Cosmopolitanism** Rosi Braidotti,Patrick Hanafin,Bolette Blaagaard,2013 At a time when social and political reality seems to move away from the practice of cosmopolitanism whilst being in serious need of a new international framework to regulate global interaction what are the new definitions and practices of cosmopolitanism Including contributions from leading figures across the humanities and social sciences After Cosmopolitanism takes up this question as its central challenge Its core argument is the idea that our globalised condition forms the heart of contemporary cosmopolitan claims which do not refer to a transcendental ideal but are rather immanent to the material conditions of global interdependence But to what extent do emerging definitions of cosmopolitanism contribute to new representative democratic models of governance The present volume argues that a radical transformation of cosmopolitanism is already ongoing and that more effort is needed to take stock of transformations which are both necessary and possible To this end After Cosmopolitanism calls for an understanding of cosmopolitanism that is more attentive to the material reality of our social and political situation and less focused on linguistic analyses of its metaphorical implications It is the call for a cosmopolitanism that is also a cosmopolitics The Sociobiological Imagination Mary Maxwell,1991-09-19 This book presents reports on the uses of sociobiology and general evolutionary theory by members of diverse disciplines psychiatry law management theory anthropology economics primatology history political science ethical philosophy cognitive psychology epistemology socioecology of religion studies of

conflict Marxist thought aesthetics sociology linguistics and psychology The purpose of the book is threefold to acknowledge the remarkably wide influence of a central idea to demonstrate that the research of human sociobiology takes place in disparate fields and to introduce the major principles of sociobiology There are many surprises to be found in these pages not least the psychiatrist's new look at anxiety the management theorist's explanation for the success of Japanese firms the Soviet philosopher's report on sociobiology in the U S S R the explanation given for the keeping of harems in ancient kingdoms and the economist's view as to why people care if a bargain price is really a fair price all cast in sociobiological terms

Routledge Handbook of Biosecurity and Invasive Species Kezia Barker, Robert A. Francis, 2021-05-11 This handbook provides a comprehensive overview of the assessment and management of potentially dangerous infectious diseases quarantined pests invasive alien species living modified organisms and biological weapons from a multitude of perspectives Issues of biosecurity have gained increasing attention over recent years but have often only been addressed from narrow disciplines and with a lack of integration of theoretical and practical approaches The Routledge Handbook of Biosecurity and Invasive Species brings together both the natural sciences and the social sciences for a fully rounded perspective on biosecurity shedding light on current national and international management frameworks with a mind to assessing possible future scenarios With chapters focussing on a variety of ecosystems including forests islands marine and coastal and agricultural land as well as from the industrial scale to individual gardens this handbook reviews the global state of invasions and vulnerabilities across a wide range of themes and critically analyses key threats and threatening activities such as trade travel land development and climate change Identifying invasive species and management techniques from a regional to international scale this book will be a key reference text for a wide range of students and academics in ecology agriculture geography human and animal health and interdisciplinary environmental and security studies

Conversations With Food Dorothy Chansky, Sarah W. Tracy, 2021-02-02 *Conversations With Food* offers readers an array of essays revealing the power of food and its absence to transform relationships between the human and non human realms to define national colonial and postcolonial cultures to help instantiate race gender and class relations and to serve as the basis for policymaking Food functions in these contexts as items in religious or secular law as objects with which to bargain or over which to fight as literary trope and as a way to improve or harm health individual or collective The anthology ranges from Ancient Greece to the posthuman fairy underworld from the codifying of French culinary heritage to the strategic marketing of 100 calorie snacks from the European famine after the Second World War to the lush and exotic cuisines of culinary tourism today *Conversations With*

Food will engage anyone interested in discovering the disciplinary breadth and depth of food studies The anthology is ideally suited for introductory and advanced courses in food studies as it includes essays in a range of humanities and social science disciplines and each author draws cross disciplinary linkages between their own work and other essays in the volume This thematic and conceptual intercalation when read with the editors introduction makes the collection an exceptionally strong representation of the field of food studies

The British National Bibliography Arthur James Wells,1996

Neoliberal Africa Professor Graham Harrison,2013-04-04 Neoliberalism has shaped African development for nearly thirty years As such it is not an economic shock or a structural adjustment but rather a historic shift in Africa s development politics and policy This book explores the ways in which African countries have experienced the neoliberal project highlighting how this project has gone beyond economic liberalisation and towards a bolder social transformation As an ideology neoliberalism projects an end point not simply of a market economy but of a market society After thirty years of projects aid disbursement technical assistance and conditionality this book maps out the extent to which African states have cleaved to neoliberal directives It suggests that neoliberal progress in Africa is notably limited in spite of the resources behind it and the lack of alternatives to it

Non-Human Nature in World Politics Joana Castro Pereira,André Saramago,2020-08-26 This book explores the interconnections between world politics and non human nature to overcome the anthropocentric boundaries that characterize the field of international relations By gathering contributions from various perspectives ranging from post humanism and ecological modernization to new materialism and post colonialism it conceptualizes the embeddedness of world politics in non human nature and proposes a reorientation of political practice to better address the challenges posed by climate change and the deterioration of the Earth s ecosystems The book is divided into two main parts the first of which addresses new ways of theoretically conceiving the relationship between non human nature and world politics In turn the second presents empirical investigations into specific case studies including studies on state actors and international organizations and bodies Given its scope and the new perspectives it shares this edited volume represents a uniquely valuable contribution to the field
