

Progress in Economics Research

Volume 51

The background of the lower half of the cover features a faint, stylized graphic. It consists of a line graph with several data series, each represented by a thin grey line with small circular markers at data points. Below the line graph is a bar chart with numerous vertical bars of varying heights, also rendered in a light grey color. The overall aesthetic is clean and academic, typical of a research journal cover.

The British Library General Catalogue of Printed Books 1976 to 1982 British Library,1983 Serials in the British Library ,1981 *Statistical Reference Index* ,1980 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), *Current Catalog* National Library of Medicine (U.S.),1993 First multi year cumulation covers six years 1965 70 The International Bibliography of Health Economics ,1986 Classified listing of all English language works published between 1914 1982 Primary criterion for inclusion was discussion of the economics of a health problem Excludes ephemera unpublished documents dissertations discussion papers and economic studies of supply industries such as the pharmaceutical industry Entries in main body give bibliographical information and annotations supplemental entries do not contain annotations Author subject indexes **Free for All?** Joseph P. Newhouse,Rand Corporation. Insurance Experiment Group,1993 In the most important health insurance study ever conducted researchers at the RAND Corporation devised all experiment to address two key questions in health care financing how much more medical care will people use if it is provided free of charge and what are the consequences for their health For three or five year periods the experiment measured both use and health outcomes in populations carefully selected to be representative of both urban and rural regions throughout the United States Participants were enrolled in a range of insurance plans requiring different levels of copayment for medical care from zero to 95 percent The researchers found that in plans that reimbursed a higher proportion of the bill patients used substantially more services indeed those who paid nothing used 40 percent more services than those required to pay a high deductible but the effect on the health of the average person was negligible In addition participants who were assigned at random to a well established health maintenance organization used hospitals substantially less than those in the fee for service system again with no measurable effect on the health of the average person This book collects in one place for the first time results previously dispersed through many journals over many years Drawing comprehensive coherent conclusions from an immense amount of data it is destined to be a classic work serving as an invaluable reference for all those concerned with health care policy health service researchers policymakers in both the public and the private sectors and students **Subject Catalog, 1981** Library of Congress,1981 *Miscellaneous Publication* , *Monthly Catalog of United States Government Publications* ,2002 **Directions** ,1980 **American Journal of Public Health** ,1980 Includes section Books and reports *Medical and Health Care Books and Serials in Print* ,1997 **Canadian Books in Print** ,1988 *Health planning reports subject index* United States. Health Resources Administration,1979
