### 1.1: Definition, Meaning, Characteristics, Emergence, Subject Matter and Scope of Political Sociology.

**Definition of Political Sociology:** Political sociology is that area of sociology that examines the nature and consequences of power within or between societies, as well as the social and political conflicts that lead to change in allocation of power.

Different writers have interpreted political sociology differently. Some leading definitions are:

- ❖ Robert E. Dowse and John A. Hughes defines it 'as the study of political behavior within a sociological perspective of frame work'
- ❖ R. Bendix and S. M. Lipset defined it as "political sociology starts with society and examines how it affects the state".
- ❖ S.M. Lipset further defined political sociology as "the study of the inter-relationship between society and polity, between social structures and political institutions".

#### Meaning and Characteristics of Political Sociology:

- Political sociology may be defined as the study of political institutions and processes in relation to their social backgrounds or setting.
- Earlier four meanings were associated with political sociology. They are:
  - a) Political sociology is the science of state,
  - b) It deals with the interaction between society and politics,
  - c) It deals with the power,
  - d) Finally, it is the integration of political science and sociology.
- After explaining the meanings of political sociology it is necessary to differentiate between political sociology and sociology of politics .the classical political sociologists consider them as the two sides of the same coin but the contemporary political sociologists tried to separate them and they point out the following differences to support their arguments .they are mentioned below:
  - Bendix and Lipset have observed that political science starts with the state and examines how it affects society, while as political sociology starts with the society and examines how it affects the state. They have argued that in political science the state is the explanatory variable of the society, but in political sociology the society is the explanatory variable of the state.
  - Sociology of Politics implies sociology of the phenomenon or process of politics while as the science of sociology has been employed to study several related sciences such as history and law.
  - The heart and soul of political sociology may be said to lie in the capture and exercise of power in political context against the sociological background where as the whole subject of politics may be said to centre round the capture and exercise of power for certain ends or goals.

**Characteristics of Political Sociology:** The chief characteristics of political sociology are:

- ❖ Political sociology is a compound science and as independent science can be said to have emerged some- where around the time of the first-world war .
- ❖ It deals with the interaction between society and politics. The views of Bendix and Lipset seem more accurate when they say political science starts with the state and examines
