The field of technical communication is concerned with how professionals communicate complex information with specialist and nonspecialist users<sup>1</sup> in order to solve practical problems, often using communication technologies, multi-modal documents, or complex documents. These professionals may be identified primarily by their roles as communicators, with varying job titles and responsibilities but with primary expertise in communication (see Brumberger and Lauer 2015); or by their roles in another professional area, such as engineering, computing, management, accounting, criminal justice, and healthcare (“workplace communication”). Although the roles and professional identities are rather distinct, the communication tasks and products with which they work are often shared. This overview will give some attention to both domains of technical communication.

Like all communicators, technical communicators make use of shared textual conventions applied in recognizably similar situations to accomplish their communication goals. Those shared conventions, or genres, simplify the technical communicator’s work by constraining the range of possibilities in a given communication situation, and they can encourage innovation by helping technical communicators understand the goals of a text and envision a range of ways to achieve those goals.

Technical communicators face special challenges:

- The subject matter of technical communication is specialized, difficult, or esoteric.

at approximately the turn of the century engineering educators recognized that writing about science and technology not only made sense in an academic milieu that emphasized utility but that such writing could also contribute to the professional success of engineering students. Existing somewhat tenuously as engineering itself sought academic status, technical communication emerged ultimately as a reconceptualized composition course after early to mid twentieth century calls for English and engineering cooperation made traditional composition offerings less relevant. Academic writing on environmental communication proliferated in the 1990s. A few of us had been calling for such work and making initial investigations throughout the 1980s but the momentum in the field built slowly. Spurred by coverage in the mass media, academic publishers finally caught the wave of interest. In this exciting new volume the editors demonstrate more fully than ever before how environmental rhetoric and technical communication go hand in hand. The key link that they and their distinguished group of contributors have discovered is the ancient concern of communication scholars with public deliberation. Environmental issues present technical communicators with some of their greatest challenges: above all, how to make the highly specialized and inscrutably difficult technical information generated by environmental scientists and engineers usable in public decision making. The editors encourage us to accept the challenge of contributing to environmentally conscious decision making by integrating technical knowledge and human values. For technical communicators who accept the challenge of working toward solutions by opening access to crucial information and by engaging in critical thinking on ecological issues, the research and theory offered in this volume provide a strong foundation for future practice.

**Rhetoric, Innovation, Technology** Stephen Doheny-Farina, 1992. Stephen Doheny Farina shows that the technical and commercial processes of turning technologies into products are in significant ways communication processes. Improving the way that technology is transferred from laboratory to marketplace is central to improving American productivity and competitiveness in a global economy. In this provocative analysis, Stephen Doheny Farina shows that the technical and commercial processes of turning technologies into products are in significant ways communication processes. He explores the key role that technical communicators must play in the movement of technology from expert designers and developers to users. Several lengthy case studies illustrate the rhetorical issues involved in technology transfers as well as the rhetorical barriers to their success. Doheny Farina argues that processes typically called information transfer and technology transfer are not transfers at all but instead are series of personal constructions and reconstructions of knowledge, expertise, and technologies by the participants attempting to adapt technological innovations for social uses. Underscoring the rhetorical nature of any technology transfer, the case studies describe the powerful effect that a startup company's business plan can have on its future, including the many factors that surround the writing of a business plan, the rhetorical barriers to the transfer of an experimental artificial heart from a university research hospital to a biomedical products manufacturer, and two compelling situations that call for the inclusion of technical writers in new product development from its inception. A final chapter focuses on the important

elements in the education of technical communicators and an appendix discusses classroom applications and includes a fictional case incorporating issues of intraorganizational barriers to collaboration in the new product development process

**Three Keys to the Past** Michael G. Moran, 1999-02-17 With an emphasis on key individuals and key movements this book is the first attempt to provide a collection of critical essays on the history of technical communication designed to help guide future research This collection consists of the classic essays in the field that have made a major contribution to the development of the field and the new essays that contribute to our historical understanding of a specific element or period of technical communication This combined with an up to date bibliography of research in the area make Three Keys to the Past as valuable to the experienced researcher in the field as to those just entering it

**Citizenship and Advocacy in Technical Communication** Godwin Y. Agboka, Natalia Matveeva, 2018-06-22 In Citizenship and Advocacy in Technical Communication teachers researchers and practitioners will find a variety of theoretical frameworks empirical studies and teaching approaches to advocacy and citizenship Specifically the collection is organized around three main themes or sections considerations for understanding and defining advocacy and citizenship locally and globally engaging with the local and global community and introducing advocacy in a classroom The collection covers an expansive breadth of issues and topics that speak to the complexities of undertaking advocacy work in TPC including local grant writing activities cosmopolitanism and global transnational rhetoric digital citizenship and social media use strategic and tactical communication and diversity and social justice The contributors themselves representing fifteen academic institutions and occupying various academic ranks offer nuanced definitions frameworks examples and strategies for students scholars practitioners and educators who want to or are already engaged in a variegated range of advocacy work More so they reinforce the inherent humanistic values of our field and discuss effective rhetorical and current technological tools at our disposal Finally they show us how through pedagogical approaches and everyday mundane activities and practices we can advocate either actively or passively

**Foundations for Teaching Technical Communication** Katherine Staples, Cezar M. Ornatowski, 1997-12-31 This is designed to be a seminal textbook for researchers and teachers of scientific and technical communication It draws together contributions from scholars in the field covering the three broad themes of theory practice and program design while focusing on topics of contemporary concern These include insights into the relevance of cognitive psychology for technical communication ethics and multicultural issues impact of new technologies visual communication design of teaching and research programmes and quality and evaluation

**Digital Literacy for Technical Communication** Rachel Spilka, 2009-12-04 Digital Literacy for Technical Communication helps technical communicators make better sense of technology's impact on their work so they can identify new ways to adapt adjust and evolve fulfilling their own professional potential This collection is comprised of three sections each designed to explore answers to these questions How has technical communication work changed in response to the current digital writing environment What is

important foundational knowledge in our field that all technical communicators need to learn How can we revise past theories or develop new ones to better understand how technology has transformed our work Bringing together highly regarded specialists in digital literacy this anthology will serve as an indispensable resource for scholars students and practitioners It illuminates technology's impact on their work and prepares them to respond to the constant changes and challenges in the new digital universe

The Top Books of the Year Research In Technical Communication The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels enthralling the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have charmed audiences this year. The Must-Read : Colleen Hoover's "It Ends with Us" This heartfelt tale of love, loss, and resilience has gripped readers with its raw and emotional exploration of domestic abuse. Hoover skillfully weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can prevail. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Research In Technical Communication : Delia Owens "Where the Crawdads Sing" This captivating coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens crafts a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These top-selling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of engaging stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a brilliant and gripping novel that will keep you speculating until the very end. The novel is a warning tale about the dangers of obsession and the power of evil.
