**Step-By-Step Guide For Beginners** Dr. Ravindra Kumar,Dr. S. Parvathy,Dr. Uma Rajmohan,Dr. Pushpa Sharma,2023-05-18 Research in its broadest sense may be thought of as the process of systematically collecting and analyzing data to gain a deeper understanding of a topic The research employs methodical approaches to address theoretical and applied concerns Studiously inquiring or examining investigating or experimenting to discover interpret facts revise the accepted theories or laws in light of the new facts or put such new or revised theories or laws into practical application is how the Oxford English Dictionary defines research Some individuals see research as a progression one that moves from the familiar to the unfamiliar Inquisitiveness is a fundamental human trait since it compels us to wonder and investigate to get a deeper and deeper grasp of the world around us Curiosity is the seed from which all knowledge grows and the process by which humans learn about the world is what we call study The word research must be used in a specialized context since it refers to a scholarly endeavour Therefore research is the original addition to the body of knowledge that contributes to its development Science is the methodical investigation of the world via the use of analogy comparison and experiment Research in a nutshell is the pursuit of answers to questions via the use of a methodical objective process Research also includes the methodical process of drawing broad conclusions and developing a hypothesis *Essentials of Business Research Methods* Joseph F. Methods for Sustainability presents a thorough and accessible overview of the ways in which sustainability is charted worldwide. Some articles introduce basic concepts such as quantitative versus qualitative data or the weak versus strong sustainability debate. Others examine how indicators in specific areas, climate change and soil conservation, agriculture and mining, have been applied or not to different regions. Research analysts explain the modes and media through which these measurements are broadcast, stressing the importance of developing methods that can be understood by both experts and ordinary citizens. They also examine the process of monitoring itself, a controversial topic affecting national or international policy, law, rules and regulations.

**Competencies of Managers and Service Excellence in Military Hospitals** Professor Emeritus Dr Syed Mohamed Aljunid, Dr Junaidah Kamarruddin, 2023-06-06. Excellence in service is needed in the Military Hospitals in Malaysia to ensure the best and the most effective services are delivered. One of the factors that contribute to the provision of excellent services is the presence of competent managers. In this book, we report the outcome of a study aimed to determine the level of service excellence among managers and the factors influencing it in five Military Hospitals under the Ministry of Defence Malaysia. A cross-sectional study was conducted using self-administered questionnaires distributed to Military and Non-Military managers with different demographic backgrounds and service characteristics. The questionnaires consist of six components: the background of the respondents, the level of service excellence, skills, knowledge of the Blue Ocean Strategy (BOS), leadership style, and organisational compliance. By using the Structural Equation Model, findings of the study showed that all independent variables, i.e., skills, knowledge, BOS, leadership style, and organisational compliance, are significantly related to service excellence. Using Stepwise Multiple Linear Regression, it was discovered that managers in the lower grades as well as Non-Military managers demonstrated significant service excellence. In conclusion, the service excellence of managers in Military Hospitals is strongly influenced by their competencies. Military Hospitals administration should focus on the needs for training and suitable courses for Military managers in senior position to enhance their competencies.
