Research on Smarandache Problems in Number Theory (collected papers), Vol. I Wenpeng Zhang,2005-01-01 Number theory is an ancient subject but we still cannot answer many simplest and most natural questions about the integers Some old problems have been solved but more arise All the research for these ancient or new problems implicated and are still promoting the development of number theory and mathematics American Romanian number theorist Florentin Smarandache introduced hundreds of interest sequences and arithmetical functions and presented many problems and conjectures in his life In 1991 he published a book named Only problems Not solutions He presented 105 unsolved arithmetical problems and conjectures about these functions and sequences in it Already many researchers studied these sequences and functions from his book and obtained important results This book Research on Smarandache Problems in Number Theory Collected papers contains 41 research papers involving the Smarandache sequences functions or problems and conjectures on them All these papers are original Some of them treat the mean value or hybrid mean value of Smarandache type functions like the famous Smarandache function Smarandache ceil function or Smarandache primitive function Others treat the mean value of some famous number theoretic functions acting on the Smarandache sequences like k th root sequence k th complement sequence or factorial part sequence etc There are papers that study the convergent property of some infinite series involving the Smarandache type sequences Some of these sequences have been first investigated too In addition new sequences as additive complement sequences are first studied in several papers of this book Most authors of these papers are my students After this chance I hope they will be more interested in the mysterious integer and number theory More future papers by my students will focus on the Smarandache notions such as sequences functions constants numbers continued fractions infinite products series etc in number theory List of the Contributors Zhang Wenpeng Xu Zhefeng Zhang Xiaobeng Zhu Minhui Gao Nan Guo Jinbao He Yanfeng Yang Mingshun Li Chao Gao Jing Yi Yuan Wang Xiaoying Lv Chuan Yao Weili Gou Su He Xiaolin Li Hailong Liu Duansen Li Junzhuang Liu Huaning Zhang Tianping Ding Liping Li Jie Lou Yuanbing Zhao Xiqing Zhao Xiaopeng Yang Cundian Liang Fangchi **Advances in Intelligent, Interactive Systems and Applications** Fatos Xhafa,Srikanta Patnaik,Madjid Tavana,2019-01-16 This book presents the proceedings of the International Conference on Intelligent Interactive Systems and Applications IISA2018 held in Hong Kong China on June 29 30 2018 It consists of contributions from diverse areas of intelligent interactive systems IIS such as autonomous systems pattern recognition and vision systems e enabled systems mobile computing and intelligent networking Internet intelligent systems and applications The book covers the latest ideas and innovations from both the industrial and academic worlds and shares the best practices in the fields of computer science communication engineering and latest applications of IOT and its use in industry It also discusses key research outputs providing readers with a wealth of new ideas and food for thought Smarandache 数论问题 (Chinese) Yuan Yi,Xiaoyu Kang,2006-01-01 This book is a collection of papers and definitions in Chinese language related to
