Research Philosophy And Techniques101:

Exploring Methods in Information Literacy Research Suzanne Lipu, Kirsty Williamson, Annemaree Lloyd, 2007-06-01 This book provides an overview of approaches to assist researchers and practitioners to explore ways of undertaking research in the information literacy field The first chapter provides an introductory overview of research by Dr Kirsty Williamson author of Research Methods for Students Academics and Professionals Information Management and Systems and this sets the scene for the rest of the chapters where each author explores the key aspects of a specific method and explains how it may be applied in practice The methods covered include those representing qualitative quantitative and mixed methods Both a chapter on the topical evidence based practice approach and another critiquing it are also included The final chapter points the way towards potential new directions for the burgeoning field Renowned information literacy researcher Dr Christine Bruce affirms the usefulness of the book New researchers and early career professionals will appreciate the clarity of the introductions provided to each of the methods covered [An Analysis of Thinking and Research About Qualitative Methods](#) W. James Potter, 2013-11-05 Written for social science scholars who want to learn more about the qualitative way of thinking this book addresses the full continuum of issues about the qualitative methodologies At one end of that continuum are the deeply philosophical concerns of ontology and epistemology At the other concrete end of that continuum are the practical issues of what is considered evidence How does one go about gathering evidence Where when and how does one analyze evidence What are the alternative ways of dealing with tone and voice in writing qualitative research The attention to practical concrete issues makes this book useful as a handbook providing a great deal of vital information to scholars who want a guide to making decisions as they navigate their research questions through the qualitative realm Uniquely qualified to write such a book Potter has earned PhDs in both qualitative methods with a concentration in linguistics and field studies and in quantitative methods with a concentration in social science theory and statistics The book is not an ideological argument that glorifies one system of thinking while attempting to persuade the reader that other systems of thinking are bankrupt Rather the book presents a respectful balanced analysis of the strengths and weaknesses of the qualitative approach The book builds to a controversial final chapter entitled Is Convergence a Possibility in which Potter synthesizes a conclusion from his analysis of a wide range of qualitative studies across three broad topic areas text focused research audience focused research and institution focused research and across seven major qualitative methodologies ethnography ethnomethodology reception study ecological psychology symbolic interactionism cultural studies and textual analysis His conclusion is that not only is there a possibility of a convergence between qualitative and quantitative approaches but that the convergence has already happened The book includes an appendix in which 95 books and articles using the qualitative approach are abstracted and analyzed to illustrate key points of methodology and methods It also includes subject and author indexes **Mixed Methods Research** Donna M. Mertens, 2023-03-23 In this

book Mertens provides a brief history of the emergence of mixed methods research and numerous examples to illustrate its application in different disciplines and geographic areas Mixed methods approaches offer researchers an exciting opportunity to explore new combinations of methods in diverse contexts the design possibilities are endless and can be incorporated in many different approaches The book presents case studies to illustrate different philosophical lenses for mixed methods design including post positivism constructivism pragmatism transformative Indigenous and dialectical pluralism The book features interviews with researchers about their experiences and practices They discuss a variety of topics including innovative research design use of technology and big data preparation of mixed methods researchers and how this research can contribute to a more just and equitable future *Qualitative Research in Education: A User's Guide* Marilyn Lichtman, 2013 This textbook provides readers with a blend of practical and theoretical information using real world examples and illustrations to help users grasp abstract ideas and apply them to their research Qualitative Research in Education Marilyn Lichtman, 2012-01-17 Helping education students become savvy qualitative researchers Qualitative Research in Education A User s Guide Third Edition continues to bring together the essential elements of qualitative research including traditions and influences in the field and practical step by step coverage of each stage of the research process Synthesizing the best thinking on conducting qualitative research in education author Marilyn Lichtman uses a conversational writing style that draws readers into the excitement of the research process Real world examples provide both practical and theoretical information helping readers understand abstract ideas and apply them to their own research A Practical Research Process for Developing a Sustainable Built Environment in Emerging Economies Andrew Ebekozi, Clinton Ohis Aigbavboa, Wellington Didibhuku Thwala, 2025-02-19 A Practical Research Process for Developing a Sustainable Built Environment in Emerging Economies aims to fill the dearth of practical research guidance and reference material with specific focus on the built environment in developing countries Global policy agendas such as Agenda 2030 the SDGs highlight the importance and growth of research and knowledge from emerging nations who are increasingly contributing to research that is critical for development and advancement The role of built environment practitioners will continue to evolve by building on the sound foundations laid down by the professions and by exploiting to the full the new technologies available to us through conducting innovative research but more guidance on the research process is necessary to ensure the integrity and quality of the output This book has been structured so that each chapter is largely free standing allowing the reader undergraduate postgraduate or practitioner to reference the material with ease It aims to provide practical guidance on conducting research and on writing a dissertation or report and begins by considering the general research background in a built environment context It then covers research ethics before moving on to discuss the importance of selecting the right research topic and title and writing a clear abstract The chapters then cover introducing a research project and the authors include a section on the problem statement research questions aims and objectives research

gap s and motivations for the study The book goes on to cover the literature review section theoretical and conceptual frameworks the various types of methodological approaches and when to apply them The findings section discussion of the results and the study s implications are then discussed before the final chapters cover the conclusion and recommendations The book provides a useful reference for higher education students graduates postgraduates and practitioners engaged in all aspects of construction and built environment research

Restorative Approaches to Conflict in Schools Edward Sellman,Hilary Cremin,Gilleen McCluskey,2013-09-05 Drawing on recent international developments in criminal justice Restorative Approaches to Conflict in Schools highlights the long term ineffectiveness of punitive models of discipline in education contexts and examines an alternative approach underpinned by the principles of restorative justice This approach provides an opportunity for adults and young people to engage with a range of processes such as group conferencing and peer mediation whereby conflict and harm are confronted and repaired a future rather than past orientation is developed relationships are built upon the values and attitudes of respect inclusion and equality pupils learn inter personal and problem solving skills as well as social responsibility staff develop skills and confidence in working restoratively the risk of future repeat problems is minimised and a positive school ethos is developed These approaches have proven to be highly effective in criminal justice systems around the world and are beginning to be applied more widely in educational contexts This edited volume draws together for the first time contributions from an interdisciplinary field of international experts and practitioners on the subject and offers both critique and guidance in order that the implementation of restorative approaches in schools may be undertaken thoughtfully and sustainably This exciting new text will be a key reference book for locating contemporary international and inter disciplinary debate in the field
