A. Lee, A. Bishop, R. H. Parker, 2014-06-23 First published in 1996 This book summarises the Seminar held in Edinburgh in 1994 in the five hundredth year since the publication of Luca Pacioli s Summa de Arithmetica Geometria Proportioni et Proportionalita Its purpose is simple but relevant to every accountant It revisits some fundamentals that lay behind Pacioli s decision to write his Summa and examines whether the accounting framework in which we work today has overlooked basic issues because of

its continued focus on development of the existing financial accounting model It analyses Pacioli s legacy from several different perspectives deliberately choosing to do so in ways that addressed considerations that his work reflected examining the nature and characteristics of the bridge between academic analysis and insight on the one hand and practical application on the other It also looks at the dominant influences in the evolution of accountancy for managing stewardship and for reporting of that stewardship By doing so it attempts to identify influences that had been less pressing and so had been ignored or overlooked and also considers how changing technology has affected the way we manage the accountancy process

Kostera,2002-10-23 The process of transition in Eastern European countries is one in which ideas of the past and present both local and Western meet and conflict Presenting a wealth of new ethnographic and interview based research Critical Management Research in Eastern Europe argues that the reform process in Central and Eastern Europe has been dominated by the traditional Western view of

management practice However this approach overlooks the fact that certain managerial and organizational practices developed in Central and Eastern Europe may still be appropriate and indeed effective within this particular setting The book brings together authors from both East and West Europe to evaluate how the two systems can best be harmonized which is particularly important in the context of EU enlargement
