## **Research Interviewing Context And Narrative:**

**Research Interviewing** Elliot George MISHLER, Elliot George Mishler, 2009-06-30 Interviews hold a prominent place among the various research methods in the social and behavioral sciences This book presents a powerful critique of current views and techniques and proposes a new approach to interviewing At the heart of Elliot Mishler's argument is the notion that an interview is a type of discourse a speech event it is a joint product shaped and organized by asking and answering questions This view may seem self evident yet it does not guide most interview research In the mainstream tradition the discourse is suppressed Questions and answers are regarded as analogues to stimuli and responses rather than as forms of speech questions and the interviewer's behavior are standardized so that all respondents will receive the same stimulus respondents social and personal contexts of meaning are ignored While many researchers now recognize that context must be taken into account the question of how to do so effectively has not been resolved This important book illustrates how to implement practical alternatives to standard interviewing methods Drawing on current work in sociolinguistics as well as on his own extensive experience conducting interviews Mishler shows how interviews can be analyzed and interpreted as narrative accounts He places interviewing in a sociocultural context and examines the effects on respondents of different types of interviewing practice The respondents themselves he believes should be granted a more extensive role as participants and collaborators in the research process The book is an elegant work of synthesis clearly and persuasively written and supported by concrete examples of both standard interviewing and alternative methods It will be of interest to both scholars and clinicians in all the various fields for which the interview is an essential tool [Narrative Matters in Medical Contexts across Disciplines](#) Franziska Gygax, Miriam A. Locher, 2015-03-13 This collection of original chapters gives center stage to the concept of narrative in medical contexts The contributors come from the disciplines of literary and cultural studies linguistics psychology and medicine and work with texts as diverse as autobiographies graphic novels Renaissance medical treatises and reports short stories reflective writing creative writing and online narratives The interdisciplinary dialogue shows the richness and scope of the concept narrative and demonstrates how crucial it is for practices in the medical context as well as in the contributing disciplines The collection raises awareness of the great variety and multivocality of narratives on the experience of illness besides paying heed to the many different positions and angles from which these narratives can be perceived read and analyzed The wide range of approaches assembled in this collection provides a comprehensive view on illness and health and on the multiple ways in which they are represented in narrative

**The SAGE Handbook of Interview Research** Jaber F. Gubrium, James A. Holstein, Amir B. Marvasti, Karyn D. McKinney, 2012-02-14 The new edition of this landmark volume emphasizes the dynamic interactional and reflexive dimensions of the research interview Contributors highlight the myriad dimensions of complexity that are emerging as researchers increasingly frame the interview as a communicative opportunity as much as a data gathering format The book

begins with the history and conceptual transformations of the interview which is followed by chapters that discuss the main components of interview practice Taken together the contributions to The SAGE Handbook of Interview Research The Complexity of the Craft encourage readers simultaneously to learn the frameworks and technologies of interviewing and to reflect on the epistemological foundations of the interview craft

### **Constructing Narratives of Continuity and Change**

Hazel Reid,Linden West,2014-08-27 In this volume academics and researchers across disciplines including education psychology and health studies come together to discuss personal political and professional narratives of struggle resilience and hope Contributors draw from a rich body of auto biographical research to examine the role of narrative and how it can be constructed to compose a life story considering the roles of significant others inspirational educational and fictional characters and those in myth and legend The book discusses how personal narrative often neglected in social and psychological enquiry can be a valuable resource across a range of settings Reference is made to the evolving role of narrative in education and health care medicine and psychotherapy This includes how particular narratives are hardwired into culture in ways that stifle personal and social understanding Rather than providing a how to guide the book illustrates the range and power of narrative including poetry to re awaken senses of self and agency in extremis Each chapter draws on specific research describing the context explaining the methodology and illuminating important findings Discussing implications for research and practice this book will be key reading for postgraduate and doctoral students in auto biographical and narrative studies and across a range of disciplines including education health and social care politics counselling and psychotherapy It will be of interest to academics teaching research methods and those developing biographical and auto biographical narrative research

**Selves and Identities in Narrative and Discourse** Michael G. W. Bamberg, Anna De Fina, Deborah Schiffrin, 2007 The different traditions that have inspired the contributors to this volume can be divided along three different orientations one that is rooted predominantly in sociolinguistics a second that is ethnomethodologically informed and a third that came in the wake of narrative interview research All three share a commitment to view self and identity not as essential properties of the person but as constituted in discursive practices and particularly in narrative Moreover since self and identity are held to be phenomena that are contextually and continually generated they are defined and viewed in the plural as selves and identities In the attempt of moving closer toward a process oriented approach to the formation of selves and identities this volume sets the stage for future discussions of the role of narrative and discourse in this generation process and for how a close analysis of these processes can advance an understanding of the world around us and within this world of identities and selves

**The Sociolinguistics of Identity** Tope Omoniyi, Goodith White, 2006-11-02 Across the social and behavioural sciences there has been an increased interest in identity as a subject of inquiry Despite this there remain questions to which researchers need to find answers and challenges

to be made to older paradigms of analysis in order to continue to push the frontiers of knowledge in this research domain Identity is a problematic concept inasmuch as we recognise it now as non fixed non rigid and always being co constructed by individuals of themselves or by people who share certain core values or perceive another group as having such values This volume re examines the analytical tools employed in the sociolinguistic research of identity in order to assess their efficiency establish the roles of language in the identity claims of specific communities of people and determine the place of identity in a variety of social contexts including work places and language classrooms It will be of interest to academics and students working in sociolinguistics applied linguistics and second language learning
