**Research Methodology** Mubashar Altaf, 2019-05-18 This book is based upon my experiences in research as a student practitioner and teacher The difficulties I faced in understanding research as a student my discoveries about what

was applicable and inapplicable in the field as a practitioner and my development of the ability effectively to communicate difficult concepts in simple language without sacrificing technicality and accuracy as a teacher has become the basis of this book. The research methodology is taught as a supporting subject in several ways in many academic disciplines such as health education, psychology, social work, nursing, public health, library studies, and marketing research. The core philosophical base for this book comes from my conviction that although these disciplines vary in content, their broad approach to a research inquiry is similar. This book therefore is addressed to these academic disciplines.
