

A woman with dark hair, wearing a blue turtleneck, is leaning over a large map of the United States. Three children are gathered around the map: a boy in a red shirt, a girl with curly hair in a pink shirt, and a girl with long brown hair in a light blue shirt. They are all looking at the map, which is laid out on a blue surface. The map shows the states in various colors, and the children appear to be engaged in a learning activity.

Quantitative and Qualitative Research in Early Childhood Education William Lawrence Goodwin, Laura D.

Goodwin, 1996 What are the fundamental elements of good quantitative and qualitative research What are the strengths and weaknesses of each approach What does research offer early childhood education Are quantitative and qualitative approaches compatible This book presents the research process and its components in a straightforward easily accessible manner Using real examples from early childhood education authors William L Goodwin and Laura D Goodwin bring to life for the first time the various methods of research and how they may be studied and applied They explore the major aspects of both quantitative and qualitative paradigms and techniques stressing the compatibility and complementary nature of the two approaches that are so often seen as mutually exclusive if not downright contradictory *Sources* Karen Menke

Paciorek, Joyce Huth Munro, 1999 Brings together over 40 selections of intellectual value classic articles book excerpts and research studies that have shaped the study of early childhood education and our contemporary understanding of it This work organizes selections around major areas of study such as teaching development learning and instruction and more

Contemporary Perspectives on Research on Child Care in Early Childhood Education Olivia Saracho, 2021-04-01 Child care environments have received extensive research attention by those interested in understanding how participating in nonparental child care might influence the children's development and learning Throughout the United States US Census Bureau 2011 and Europe Organization for Economic Co operation and Development 2006 a large number of young children

are cared for outside of the home by non parental adults Young children s nonparental care is commonly referred to as child care and is provided to children whose ages range from birth to 12 years of age The provision of child care services has become an increasingly important part of early childhood education In fact the United Nations Children s Fund 2019 states that a large majority of children worldwide spend at least some of their week in child care such arrangements include center care family child care in home child care relative child care and supplemental child care Child care researchers have been conducting studies to understand how participating in nonparental child care might influence the children s development and learning outcomes There are more than enough child care studies to make numerous major inferences For example research outcomes show that child care quality seems to be more influential than either the kind of child care or age of admission in determining the children s development and learning The adults child care affects the quality in child care In the environment adults who are caring for the children have the opportunity to effectively assume both nurturing and instructional roles to help young children cultivate their social and cognitive abilities The teachers effectiveness is related to their individual characteristics such as formal education specialized training and the classroom environment However the majority of the studies show that both family and quality of child care have the most significant effects on the children s development and learning Therefore the concept of child care has heavily influenced modern views Researchers scholars and educators are beginning to understand the current foundations based on theoretical frameworks that contribute to the purposes of the child care in the United States and Europe The contents of the child care volume reflect the major shifts in the views of these early childhood researchers scholars and educators in relation to research outcomes on child care its historical roots the role of child care in early childhood education and its relationship to theory research and practice
