Rivals Beyond Trade Dennis J. Encarnation, 1993 Rival Capitalists Jeffrey A. Hart, 1992 Hart describes the global structure of production and consumption in the five major capitalist countries and offers a rich comparative history of their industrial policymaking. He concludes that variations in state-societal arrangements and the impact these differences have on the creation and diffusion of new technologies provide the best explanation for divergences in international competitiveness. In Japan, state and business are allied but labor is marginalized; whereas in Germany, labor and business are allied and the state is decentralized. Yet both countries have become increasingly competitive because they have developed institutional mechanisms for technology diffusion. France's state-led system in contrast is linked with only moderate competitiveness. The decline of competitiveness in the United States and Britain, Hart concludes, may be attributed to state-societal arrangements that have allowed one actor, labor in Britain, business in the United States, to dominate policymaking. **Beyond Japan** Peter J. Katzenstein, Takashi Shiraishi, 2006 This book argues that East Asia's regional dynamics are no longer the result of a simple extension of any one national model. *Beyond Beijing* Dali L. Yang, 2012-10-12 This book offers a balanced assessment of the dynamics and consequences of the decentralization of power and resources in post-Mao China. The author argues that decentralization has increased tensions amongst ethnic groups and unleashed much competition and emulation among local governments. This book is an authoritative study of an issue that will remain highly visible on China's political agenda for the foreseeable future. *US-Asia Economic Relations* Justin Robertson, 2008-09-02 Pt 1 Towards a different approach pt 2 US economic behaviour in Asia after the financial crisis pt 3 Explaining divergent US economic interests The Politics of International Economic Relations Jeffrey A. Hart, Joan Edelman Spero, 2013-06-17 The first and definitive book of its kind. Joan Spero's *The Politics of International Economic Relations* has been fully updated to reflect the sweeping changes in the international arena. With the expertise of co-author Jeffrey Hart, the fifth edition strengthens the coverage of political and economic relations since the end of the Cold War, economic polarization in developing nations, and the roots of economic decline in centrally planned economies. A new chapter on industrial policy and competitiveness debates further illustrates the changing dynamics of International Political Economy. Ideal as a supplement to the International Relations course or as the core text in International Political Economy. Spero and Hart's *The Politics of International Economic Relations* continues to give students the breadth and depth of scholarship needed to understand the politics of world economy. **APEC** Chia Siow Yue, 1994 Political and academic interest in economic relations among APEC economies and in the APEC process has been gaining momentum. The November 1993 Seattle meetings of APEC ministers and leaders marked a turning point for the APEC forum. *APEC Challenges and Opportunities* is the result of the First APEC Roundtable held in June 1994 to analyze the issues involved and explore the future direction of APEC. Two papers provide the background for the analysis of APEC.

economic relations and the co operation agenda one examining security issues in the region and the other the economic dynamism of East Asia The next set of papers trace the evolution of the concept of Asia Pacific economic co operation examine the APEC process and structure as well as differences in American and Asia approaches and explore the likely institutional structure and appropriate agenda for APEC Also looked into are the trends and patterns of trade and investment interdependence among the APEC countries the various options for regional trade and investment facilitation and the cse for an APEC free trade area and an APEC investment code The two final papers examine subsets of the APEC relationships namely the complementary and competitive elements between ASEAN and APEC and between ASEAN and NAFTA

International Production Networks in Asia Michael Borrus,Dieter Ernst,Stephan Haggard,2003-09-02 This book addresses the changing nature of high tech industries in Asia particularly in the electronics sector Its up to date findings will be invaluable to those involved in management production networks and corporate strategy **Japan's Policy Trap** Akio Mikuni,R. Taggart Murphy,2003-11-26 Until quite recently the Japanese inspired a kind of puzzled awe They had pulled themselves together from the ruin of war built at breakneck speed a formidable array of export champions and emerged as the worlds number two economy and largest net creditor nation But today only the puzzlement remains This book offers a provocative new analysis of the countrys protracted economic stagnation The Hidden Hand of American Hegemony David E. Spiro,2019-06-30 Between 1973 and 1980 the cost of crude oil rose suddenly and dramatically precipitating convulsions in international politics Conventional wisdom holds that international capital markets adjusted automatically and remarkably well enormous amounts of money flowed into oil rich states and efficient markets then placed that new money in cash poor Third World economies David Spiro has followed the money trail and the story he tells contradicts the accepted beliefs Most of the sudden flush of new oil wealth didn t go to poor oil importing countries around the globe Instead the United States made a deal with Saudi Arabia to sell it U S securities in secret a deal resulting in a substantial portion of Saudi assets being held by the U S government With this arrangement the U S government violated its agreements with allies in the developed world Spiro argues that American policymakers took this action to prop up otherwise intolerable levels of U S public debt In effect recycled OPEC wealth subsidized the debt happy policies of the U S government as well as the debt happy consumption of its citizenry *Consumer Capitalism* Gunnar Trumbull,2018-07-05 The unfettered marketplace in which uncertainty rules and the admonition caveat emptor let the buyer beware dictates each consumer decision has today virtually disappeared Consumers have become the focus of intensive economic policymaking designed to protect them from the risks and disappointments of the market Today arguably no other economic actor in the advanced industrial countries not the investor not the worker not the welfare recipient enjoys a more thorough set of legal and institutional protections than the modern consumer when he or she enters the corner store from the IntroductionGunnar Trumbull investigates the origins of national systems of consumer protection in France and Germany where in the early 1970s consumer groups and producers

organized to advance their own ideas about the identity and interests of the affluent consumer Through a comparison of eight areas of policy product liability law product safety standards and recall misleading advertising comparative product tests product labeling quality standards consumer contracts and pricing Trumbull shows that different conceptions of the consumer interest emerged in the two countries The result was the development of distinctive national consumption regimes which have in turn influenced the market strategies of domestic producers Trumbull's findings help to clarify distinctive national approaches to recent product crises including cases of BSE and genetically modified foods His research suggests that in the age of consumer capitalism national competitiveness may hinge not only on endowments of labor and capital but also on the institutional forms of national consumption

Issues and Agents in International Political Economy Benjamin J. Cohen, Charles Lipson, 1999 This is the second of two anthologies on international political economy drawn from articles published in the journal *International Organization* The book is organized into four sections Trade Multinational Firms and Globalization Money and Finance and Emerging Issues

Governing Ideas J. Nicholas Ziegler, 2019-05-15 Despite increasingly open markets and a pervasive move toward international production methods national governments continue to pursue remarkably distinctive policies for promoting innovation in industry J Nicholas Ziegler analyzes this apparent paradox by comparing government efforts to promote technological advance in Germany and France His findings reveal a great deal about the roots and limits of public strategies for economic growth Through close comparison of three technologies digital telephone exchanges computer controlled machine tools and semiconductors Ziegler shows how each country displays predictable strengths and weaknesses in promoting innovation These distinctive capacities depend more upon the links among different skill and knowledge bearing elites than on the structure of the state or the industrial sector in question As business outcomes hinge less on economies of scale and more on knowledge based competition the politics of contending interest groups steadily gives way to a competition for status and jurisdiction among more specialized professional groups As a result Germany's strengths stem directly from what Ziegler calls an ethos of competence whereas France's strengths stem from an order of state created elites More generally Ziegler contends neo institutional approaches to public policy need to pay far more attention to the professional identities of different occupational groups

Nationalism, Liberalism, and Progress: The dismal fate of new nations Ernst B. Haas, 1997 Has global liberalism made the nation state obsolete Or on the contrary are primordial nationalist hatreds overwhelming cosmopolitanism To assert either theme without serious qualification according to Ernst B Haas is historically simplistic and morally misleading Haas describes nationalism as a key component of modernity and a crucial instrument for making sense of impersonal rapidly changing and heterogeneous societies He characterizes nationalism as a feeling of collective identity a mutual understanding experienced among people who may never meet but who are persuaded that they belong to a community of kindred spirits Without nationalism there could be no large integrated state He explores nationalism in five societies that had achieved the status of nation states by

about 1880 the United States Britain France Germany and Japan Polar Politics Oran R. Young, Gail Osherenko, 1993 Co recipient of the 1994 Harold and Margaret Sprout Award given by the Environmental Studies Section of the International Studies Association A region of critical environmental significance the Arctic continues to be the focus of international conflicts of interest How well have nations succeeded in creating regimes that establish international rights and responsibilities in the circumpolar North **Norms in International Relations** Audie Klotz, 2018-09-05 In this second edition of Norms in International Relations Audie Klotz revisits the global struggle against apartheid and considers its impact on how we grapple with race and racism in international relations today Originally published in the wake of South Africa's democratic transition Norms in International Relations documented how sustained international activism transformed apartheid from a domestic injustice into a global problem Through chapters on multilateral institutions and bilateral pressures Klotz showed how sanctions campaigns challenged state interests and reshaped global norms This second edition retains the original chapters as a historical snapshot of late Cold War diplomacy while new material traces the evolving meaning of apartheid itself from a uniquely racialized regime to a more diffuse symbol of inequality Klotz cautions that as apartheid becomes a generalized moral shorthand its roots in systemic anti Blackness risk being obscured Bringing together case study specificity with broad contemporary resonance this second edition invites readers to rethink the politics of race resistance and norm diffusion in international relations and to confront what the field still too often leaves out **The Nordic States and European Unity** Christine Ingebritsen, 1998 The idea of European unity which the Nordic states have historically resisted has recently become the foremost concern of Sweden Denmark Norway Iceland and Finland Christine Ingebritsen provides a timely analysis of Nordic economic and security policies in the wake of the vast transformation of regional politics between 1985 and 1995 The Nordic States and European Unity addresses two central questions Why did all five Nordic states trade autonomy for integration after 1985 And why do some follow the British pattern resisting supranationalism while others prefer the German strategy of embedding their policies in a common European project Through extensive interviews with representatives of trade unions government ministries parliamentary committees social movements and military and industrial organizations Ingebritsen charts adjustments to the idea of a regional system of governance She highlights crucial differences among these nations as they seek to protect their borders against new security threats In particular Ingebritsen shows how the political influence of leading sectors affects each state's capacity to pursue an integrationist policy Economic sectors are not uniformly affected by European policy coordination and the experience of the Nordic states demonstrates this difference Her work shifts the focus of political economics away from enduring domestic institutions toward an understanding of institutions as sectoral and transnational **Japan Remodeled** Steven Kent Vogel, 2006 As the Japanese economy languished in the 1990s Japanese government officials business executives and opinion leaders concluded that their economic model had gone terribly wrong They questioned the very institutions that had been

credited with Japan's past success a powerful bureaucracy guiding the economy close government industry ties lifetime employment the main bank system and dense interfirm networks Many of these leaders turned to the U S model for lessons urging the government to liberate the economy and companies to sever long term ties with workers banks suppliers and other firms Despite popular perceptions to the contrary Japanese government and industry have in fact enacted substantial reforms Yet Japan never emulated the American model As government officials and industry leaders scrutinized their options they selected reforms to modify or reinforce preexisting institutions rather than to abandon them In Japan Remodeled Steven Vogel explains the nature and extent of these reforms and why they were enacted Vogel demonstrates how government and industry have devised innovative solutions The cumulative result of many small adjustments is he argues an emerging Japan that has a substantially redesigned economic model characterized by more selectivity in business partnerships more differentiation across sectors and companies and more openness to foreign players **Remapping East Asia** T. J.

Pempel, 2018-08-06 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In Remapping East Asia T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan's leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly
