Fishing, Gone? Sid Dobrin,2019-03-27 Humans have a rapacious relationship with the world s ocean extracting immeasurable quantities of its inhabitants and resources while simultaneously depositing unbound sums of pollution into it If we are to move toward sustainable practices then we must first move toward ways of thinking about fish and fisheries beyond mere economic agendas And there is one group in particular who could make an impact saltwater anglers Recreational saltwater fishing is big business and big culture The industry is one of the largest in the United States but that has not translated into a cohesive effort agenda or ethic Saltwater anglers a diverse group with a range of motivations do not belong to a single organization through which to galvanize significant voting or lobbying power toward conservation regulation As a result federal policymakers have traditionally focused on commercial harvesting interests Dubbed the most contemplative of pastimes recreational fishing provides a valuable perspective on how humans interact with saltwater environments Fishing Gone builds on this tradition of reflection and opens up the saltwater sportfishing life as a method for thinking through the current status of marine fisheries and environment Author Sid Dobrin

calls on fellow saltwater anglers to reconsider their relationship to fishes and the ocean the sport can no longer be only about the joy and freedom of fishing but it must also be about living for the ocean living with the ocean and living through the ocean It is about securing the opportunity to fish on while meeting the economic and environmental challenges that lie ahead
