Legends of the Fire Spirits Robert Lebling, 2010-07-30
An energy a pulse form of quantum physics perhaps alive at the margins of sleep or madness and more often in the whispering of a single unwelcome thought The Economist According to Islamic tradition Allah created three types of beings angels made of light humans made of earth and jinn made of smokeless fire Supernatural shape shifting intelligent and blessed with free will and remarkable powers jinn have over the ages been given many names demon spirit ghouls genie ifrit and shaitan Neither human nor immortal they roam the earth inhabiting dark and empty places luring humans to their deaths or demonically possessing them if harmed or offended Despite the fact they cannot be seen jinn are said to be strangely human like marrying bearing children forming communities and tribes eating sleeping playing and facing

judgement like any other human They are ever present partners in the human experience causing endless mischief providing amazing services and sometimes inducing sheer terror Believed in by hundreds of millions of people throughout the world and from all faiths jinn have played a particularly central role in the literature culture and belief systems of the Middle East and the Islamic world Legends of the Fire Spirits explores through time and across nations the enduring phenomenon of the jinn From North Africa to Central Asia from the Mediterranean to sub Saharan Africa and beyond this riveting often chilling yet reasoned book draws on long forgotten ancient testimonies medieval histories colonial records anthropologist s reports and traveller s tales to explore the different types of jinn their behaviour society culture and long history of contact with humankind It documents their links with famous figures in history such as King Solomon and the Queen of Sheba and illustrates the varied and vivid portrayals of jinn in world literature In essence Legends of the Fire Spirits demonstrates the colourful diversity of human culture and the durability of faith and is a magnificent and indispensable portrayal of the rich folklore of the Islamic world

Archaeology's Visual Culture Roger Balm,2015-12-14 Archaeology s Visual Culture explores archaeology through the lens of visual culture theory The insistent visibility of archaeology is a key stimulus for the imaginative and creative interpretation of our encounters with the past Balm investigates the nature of this projection of the visual revealing an embedded subjectivity in the imagery of archaeology and acknowledging the multiplicity of meanings that cohere around artifacts archaeological sites and museum displays Using a wide range of case studies the book highlights how archaeologists can view objects and the consequences that ensue from these ways of seeing Throughout the book Balm considers the potential for documentary images and visual material held in archives to perform cultural work within and between groups of specialists With primary sources ranging from the mid nineteenth to the early twenty first century this volume also maps the intellectual and social connections between archaeologists and their peers Geographical settings include Britain Cyprus Mesoamerica the Middle East and the United States and the sites of visual encounter are no less diverse ranging from excavation reports in salvage archaeology to instrumentally derived data sets and remote sensing imagery By forensically

examining selected visual records from published accounts and archival sources enduring tropes of representation become apparent that transcend issues of style and reflect fundamental visual sensibilities within the discipline of archaeology
