Robert Smithson Robert Smithson, Eugenie Tsai, Cornelia H. Butler, Thomas E. Crow, Alexander Alberro, Museum of Contemporary Art (Los Angeles, Calif.), Moira Roth, Whitney Museum of American Art, 2004 This catalogue is the major study of Smithson 1938 1973 who is most renowned as an early earthworks artist and creator of Spiral Jetty a 1 500 foot rock coil dramatically situated in the Great Salt Lake Robert Smithson Alexander Alberro, 2004 *Robert Smithson Unearthed* Eugenie Tsai, Robert Smithson, 1991 Robert Smithson Unearthed Drawings Collages Writings the first full survey of this artist s work reevaluates its larger resonance and its place in the historical development of recent art Eugenie Tsai s re presentation of the work of Smithson expands our understanding of his achievement Looking beyond the Minimalist structures and the earthworks for which she is best known she explores his intellectual and aesthetic roots his early imaginings and discovers a richer range of personal affect in Smithson s art than we had been led to expect *Robert Smithson* Ann Reynolds, 2004-10-01 An examination of the interplay between cultural context and artistic practice in the work of Robert Smithson Robert Smithson 1938 1973 produced his best known work during the 1960s and early 1970s a period in which the boundaries of the art world and the objectives of art making were questioned perhaps more consistently and thoroughly than any time before or since In Robert Smithson Ann Reynolds elucidates the complexity of Smithson s work and thought by placing them in their historical context a context greatly enhanced by the vast archival materials that Smithson s widow Nancy Holt donated to the Archives of American Art in 1987 The archive provides Reynolds with the remnants of Smithson s working life magazines postcards from other artists notebooks and perhaps most important his library from which she reconstructs the physical and conceptual world that Smithson inhabited Reynolds explores the relation of Smithson s art making thinking about art making writing and interaction with other artists to the articulated ideology and discreet assumptions that determined the parameters of artistic practice of the time A central focus of Reynolds s analysis is Smithson s fascination with the blind spots at the center of established ways of seeing and thinking about culture For Smithson New Jersey was such a blind spot and he returned there again and again alone and with fellow artists to make art that through its location alone undermined assumptions about what and more important where art should be For those who guarded the integrity of the established art world New Jersey was elsewhere but for Smithson elsewheres were the defining if often forgotten locations on the map of contemporary culture Inside the Spiral Suzaan Boettger, 2023-04-11 An expansive and revelatory study of Robert Smithson s life and the hidden influences on his iconic creations This first biography of the major American artist Robert Smithson famous as the creator of the Spiral Jetty deepens understanding of his art by addressing the potent forces in his life that were shrouded by his success including his suppressed early history as a painter his affiliation with Christianity astrology and alchemy and his sexual fluidity Integrating extensive investigation and acuity Suzaan Boettger uncovers Smithson s story and with it symbolic meanings across the span of his painted and drawn images sculptures essays

and earthworks up to the Spiral Jetty and beyond to the circumstances leading to what became his final work Amarillo Ramp While Smithson is widely known for his monumental earthwork at the edge of the Great Salt Lake Inside the Spiral delves into the arc of his artistic production recognizing it as a response to his family's history of loss which prompted his birth and shaped his strange intelligence Smithson configured his personal conflicts within painterly depictions of Christ's passion the rhetoric of science fiction imagery from occult systems and the impersonal posture of conceptual sculpture Aiming to achieve renown he veiled his personal passions and transmuted his professional persona becoming an acclaimed innovator and fierce voice in the New York art scene Featuring copious illustrations never before published of early work that eluded Smithson's destruction as well as photographs of Smithson and his wife the noted sculptor Nancy Holt and recollections from nearly all those who knew him throughout his life Inside the Spiral offers unprecedented insight into the hidden impulses of one of modern art's most enigmatic figures With great sensitivity to the experiences of loss and existential strife that defined his distinct artistic language this biographical analysis provides an expanded view of Smithson's iconic art pilgrimage site and the experiences and works that brought him to its peculiar blood red water **The Whole Artist** Rhea Anastas, 2004

Entropic Philosophy Shannon M. Mussett, 2022-01-31 Now is a time of tremendous anxiety about the present and future state of the world As the second law of thermodynamics states entropy never decreases time marches relentlessly forward and closed systems inevitably break down Entropy serves as a powerful metaphor capturing expressions of growing malaise and decline Entropic Philosophy Chaos Breakdown and Creation builds on the meaning of entropy from the Greek entropia signifying a turning toward or transformation Developing a philosophy of entropy this book draws variously from anthropology psychoanalysis literature art and the history of philosophy This approach opens pathways for reverence and care that are crucial in preventing fear existential inertia and despair Memory & Oblivion A.W. Reinink, Jeroen Stumpel, 2012-12-06 Memory is a subject that recently has attracted many scholars and readers not only in the general historical sciences but also in the special field of art history However in this book in which more than 130 papers given at the XXIXth International Congress of the History of Art Amsterdam 1996 have been compiled Memory is also juxtaposed to its counterpart Oblivion thus generating extra excitement in the exchange of ideas The papers are presented in eleven sections each of which is devoted to a different aspect of memory and oblivion ranging from purely material aspects of preservation to social phenomena with regard to art collecting from the memory of the art historian to workshop practices from art in antiquity to the newest media from Buddhist iconography to the Berlin Wall The book addresses readers in the field of history

history of art and psychology **Beyond Objecthood** James Voorhies, 2017-02-24 The rise of the exhibition as critical form and artistic medium from Robert Smithson's antimodernist non sites in 1968 to today's institutional gravitation toward the participatory In 1968 Robert Smithson reacted to Michael Fried's influential essay *Art and Objecthood* with a series of works called non sites While Fried described the spectator's connection with a work of art as a momentary visual engagement Smithson's non sites asked spectators to do something more to take time looking walking seeing reading and thinking about the combination of objects images and texts installed in a gallery In *Beyond Objecthood* James Voorhies traces a genealogy of spectatorship through the rise of the exhibition as a critical form and artistic medium Artists like Smithson Group Material and Michael Asher sought to reconfigure and expand the exhibition and the museum into something more active open and democratic by inviting spectators into new and unexpected encounters with works of art and institutions This practice was sharply critical of the ingrained characteristics long associated with art institutions and conventional exhibition making and yet Voorhies finds over time the critique has been diluted by efforts of the very institutions that now gravitate to the participatory *Beyond Objecthood* focuses on innovative figures artworks and institutions that pioneered the exhibition as a critical form tracing its evolution through the activities of curator Harald Szeemann relational art and New Institutionalism Voorhies examines recent artistic and curatorial work by Liam Gillick Thomas Hirschhorn Carsten Holler Maria Lind Apolonija Uterić and others at such institutions as Documenta e flux Manifesta and Office for Contemporary Art Norway and he considers the continued potential of the exhibition as a critical form in a time when the differences between art and entertainment increasingly blur **Spoil Island** Charlie Hailey, 2013-08-01 Is there an allure of spoiled places Spoil islands are overlooked places that combine dirt with paradise waste land with brave new world and wildness with human intervention Although they are mundane products of dredging these islands form an uninvestigated archipelago that demonstrates the potential value and contested re valuation of landscapes of waste To explore these islands Spoil Island Reading the Makeshift Archipelago navigates a course along the U S east coast moving from New York City to Florida Along the way a general populace squats picnics and reflects on the islands while other forces are also at work New York City parks commissioner Robert Moses first deplores then adopts Hoffman and Swinburne Islands UN Secretary General U Thant meditates on the East River's Belmont Island businessman John D MacArthur rejects the purchase of Peanut Island artist Christo surrounds Miami's spoil islands Key Westers debate the futures of two spoil islands that mark their sunset view and artist Robert Smithson augments this archipelago materially and conceptually Historical and contemporary stories highlight each island's often contradictory ecologies that pair nature with infrastructure public concerns with private development rationalized urbanism with artistic impulse and order with disorder Spoil islands put you in places you normally wouldn't and perhaps shouldn't be To examine these marginalized topographies is to understand emergent concerns of twenty first century place making public space and natural and artificial infrastructure Today spoil islands constitute an unprecedented

public commons where human agency and nature are inextricably linked Spoil Island will be of interest to anyone working in the areas of architecture cultural history cultural geography environmental studies or environmental philosophy Linking the islands with their environmental aesthetics Charlie Hailey provides a lively and critical topography of places that play a part in current events and local situations with global implications Metaphorical Materialism Dominic Rahtz,2021-06-29 In Metaphorical Materialism Art in New York in the Late 1960s Dominic Rahtz returns to a period when the materiality of art was thematized and theorized according to varying conceptions of matter and form and consciously related to materialisms held as wider philosophical and political positions and attitudes The book consists of a volume of essays on the relationships between materiality and materialism informed by definitions of labour process corporeality and language in the work of Carl Andre Robert Smithson Richard Serra Eva Hesse and Lawrence Weiner *Rendezvous with the Sensuous* John Murungi,2014-03-17 In *Rendezvous with the Sensuous* readers are drawn to and become situated within the dynamic place of the aesthetic experience While there human sensuousness comes into relief as it combines with the sensuousness that derives from nature In this complex place where artistic expression coalesces with the natural world readers are extended an invitation to share in the journey of a richly diverse synesthetic experience and to gain a greater appreciation of the important place of the sensuous in illuminating the role of aesthetics in the world of ideas SpatioTemporalities on the Line Sebastian Dorsch,Jutta Vinzent,2017-11-20 Lines are omnipresent in our everyday experience and language They reflect and influence the spatial and temporal structures of our world view Taking Tim Ingold s cultural history of the line as a starting point this book understands lines as expressions that allow insights into cultural theoretical phenomena and thus go beyond their mere form The essays will investigate this premise from various disciplines architecture art cartography film literature and philosophy Gendering Landscape Art Steven Adams,Anna Gruetzner Robins,2000 While gender has been the subject of extensive critical inquiry the debate has focused primarily on the human particularly the female body The spaces bodies occupy and the ways in which those spaces are depicted in landscape art has not however been subject to investigation This book is the first sustained attempt to fill this gap in art history **Hot Art, Cold War - Western and Northern European Writing on American Art 1945-1990** Claudia Hopkins,Iain Boyd Whyte,2020-09-17 *Hot Art Cold War Northern and Western European Writing on American Art 1945 1990* is one of two text anthologies that trace the reception of American art in Europe during the Cold War era through primary sources With the exception of those originally published in English the majority of these texts are translated into English for the first time from eight languages and are introduced by scholarly essays They offer a representative selection of the diverse responses to American art in Great Britain Ireland France Belgium the Netherlands West Germany FRG Austria Switzerland Denmark Norway Sweden and Finland There was no single European discourse as attitudes to American art were determined by a wide range of ideological political social cultural and artistic positions that varied considerably across the European nations This volume and its companion *Hot Art*

Cold War Southern and Eastern European Writing on American Art 1945 1990 offer the reader a unique opportunity to compare how European art writers introduced and explained contemporary American art to their many and varied audiences. Whilst many are fluent in one or two foreign languages few are able to read all twenty five languages represented in the two volumes. These ground breaking publications significantly enrich the fields of American art studies and European art criticism. This book together with its companion volume Hot Art Cold War Southern and Eastern European Writing on American Art 1945 1990 is a joint initiative of the Terra Foundation for American Art and the editors of the journal Art in Translation at the University of Edinburgh. The journal launched in 2009 publishes English language translations of the most significant texts on art and visual cultures presently only available only in their source language. It is committed to widening the perspectives of art history making it more pluralist in terms of its authors viewpoints and subject matter.

Elemental Sculpture Todor Todorov, 2014-03-17. This book represents a research endeavour in the area of contemporary sculpture describing an unexplored tendency in the development of the relationship between sculpture and the natural elements referred to here as Elemental Sculpture. The studies included in this book reveal the context of locations where this kind of sculpture may be found: park, urban, landscape, nature, and discuss the impact of these places on the development of sculpture. This book examines the tendency towards Elemental Sculpture as part of a new level of relationship between man and nature in arts and in general. It presents in depth research of contemporary sculpture: the roots of Elemental Sculpture and its development in the works of such well known sculptors as Barbara Hepworth, Henry Moore, Alexander Calder, George Rickey and Susumu Shingu among others. Sculptures created by the author in the area of Elemental Sculpture during 35 years of his professional career are included and described from theoretical and practical points of view.
