only a small fraction of the total travel market many travel intermediaries entered it in anticipation of huge profits The number of travellers who use the internet to obtain travel services and the money they spend on line for travel purposes is growing rapidly But competition and marketing in the on line travel market is strongly affected by the unique characteristics of the internet In order to stay in business in the long run a deeper understanding of the effects of the internet on the travel industry and on the marketing of individual travel firms is necessary Also the internet threatens to eliminate intermediaries by linking service providers and customers directly Therefore an evaluation of the marketing impacts of the internet is even more vital for travel intermediaries Second a key element of every on line marketing strategy is customer loyalty Many internet travel intermediaries are able to attract a large number of visitors to their web pages But most of these internet users are not loyal and visit the web page only once Since a loyal customer base is essential to generate revenues on the internet the concept of customer loyalty will be analyzed in the on line context The first part of this thesis evaluates the influences of the internet on the marketing of on line travel intermediaries Chapter 1 highlights the important characteristics of the internet These unique features have effects on industries and on individual companies which are analyzed in Chapter 2 Chapter 3 uses the framework of the previous chapter to demonstrate the impacts of the internet on the travel industry and
