layered unity of ideas and objects of invention and manifestation of content and form However there is an antagonistic dimension to it because content and form are traditionally represented by the entirely different realms of curator and designer Future successful developments in exhibition making are dependent on whether this gap of antagonism can be bridged space time narrative calls for a paradigmatic shift of focus It puts forward a unique approach breaking down traditional barriers and offering a wide ranging theoretical context redefining and expanding the parameters and the dynamics of the exhibition format in terms of an open narrative environment which at its roots displays deep similarities with performance on stage or installation in urban and rural space The book breaks new ground by looking at the exhibition as a cultural format firstly within a great sweep of the arts in general weaving a web of philosophical museological linguistic and media theoretical references which expands the contextual field of the profession It then offers unique and important insights from within in extreme close up by bringing together interviews with six of the leading exhibition designers who discuss the dynamics of the medium its interactive dimensions the soft parameters of the exhibition and how to get to grips with the format as a complex narrative space in which the public takes part Curator and designer should reposition themselves professionally at the heart of the axis which divides or connects content and form *A Dictionary of the Avant-gardes* Richard Kostelanetz, H. R. Brittain, 2001 Introduces the concept of avant garde art to readers as it has been practiced over the last century Covering figures and genres in all styles of art this is an ideal introduction to often misunderstood art forms
