Russia and Its Northeast Asian Neighbors Kimitaka Matsuzato, 2016-12-07 As a result of the Aigun 1858 and Beijing Treaties 1860 Russia had become a participant in international relations of Northeast Asia but historiography has underestimated the presence of Russia and the USSR in this region This collection elucidates how Russia's expansion affected early Meiji Japan's policy towards Korea and the late Qing Empire's Manchurian reform Russia participated in the mega imperial system of transportation and customs control in Northern China and created a transnational community around the Chinese Eastern Railway and Harbin City The collection vividly describes daily life of the emigre Russians community in Harbin after 1917 The collection investigates mutual images between the Russians and Japanese through the prism of the descriptions of the Japanese Imperial House in Russian newspapers and memoirs written by Russian POWs in and after the Russo Japanese War and war journalism during this war The first Soviet ambassador in Japan V Kopp proposed to restore the division of spheres of interest between Russia and Japan during the tsarist era and thus conflicted People's Commissar of Foreign Affairs G Chicherin the Soviet ambassador in Beijing L Karakhan and Stalin since the latter group was more loyal to the cause of China's national liberation As a whole the collection argues that it is difficult to understand the modern history of Northeast Asia without taking the Russian factor seriously Engineer of Revolutionary Russia Anthony Heywood, 2016-05-13 This book is the first substantial study in any language of one of revolutionary Russia's most distinguished and controversial engineers Iurii Vladimirovich Lomonosov 1876 1952 Not only does it provide an outline of his remarkable life and career it also explores the relationship between science technology and transport that developed in late tsarist and early Soviet Russia Lomonosov's importance extends well beyond his scientific and engineering achievements thanks to the rich variety and public prominence of his professional and political activities His generation Lenin's generation was inevitably at the forefront of Russian life from the 1910s to the 1930s and Lomonosov took his place there as one of the country's best known and ultimately notorious engineers As well as an innovative engineer who campaigned to enhance the role of science he played a major role in shaping and administering the Russian railways and undertook several diplomatic and scientific missions to the West during the early years of the Revolution Falling from political favour during an assignment in Germany 1923 1927 he achieved notoriety in Russia as a non returner by apparently declining to return home Thereby escaping probable arrest and execution he began a new life abroad 1927 1952 which included a research post at the California Institute of Technology in 1929 1930 collaborative projects with the famous physicist P L Kapitsa in Cambridge a long time association with the Institution of Mechanical Engineers in London and work for the British War Office during the Second World War From Marxist revolutionary to American academic this study reveals Lomonosov's extraordinary life

Drawing on a wide variety of official Russian sources as well as Lomonosov's own diaries and memoirs a vivid portrait of his life is presented offering a better understanding of how science technology and politics interacted in early twentieth century Russia
