Global Social Policy Bob Deacon, 1997-10-27 This accessible text looks at the impact of the globalization process on social policy. National social policy is increasingly determined by global economic competition and international organizations. Its substance is becoming more and more transnational and now has to be understood in terms of global social redistribution, social regulation, social provision and empowerment. Global Social Policy examines trends in global inequity and summarizes the diverse experiences of different welfare regimes across the world. The authors review the social policies of international organizations such as the World Bank, the International Monetary Fund, UN Agencies and the European Union and show them to be engaged in heated controversy regarding the future for welfare. They argue that this concealed global discourse needs to be brought into an accountable arena.

Inequalities of the World Göran Therborn, 2006 A groundbreaking exploration of contemporary global inequality by leading scholars from across the world.

Russian Modernization Markku Kivinen, Brendan G. Humphreys, 2020-11-29 Building on an original interpretation of social theory and an interdisciplinary approach, this book creates a new paradigm in the Russian studies. Taking a fresh view of Russia's multiple experiences of modernization, it seeks to explain the Putin era in a completely new way. This book explores the paradoxical and contradictory aspects of Russia, analyzing the energy-dependent economy and hybrid political regime, but also religion, welfare and culture and their often complex interrelations. Written by a community of both Western and Russian scholars, this book reaffirms the value of social science when confronting a society that has undergone enormous and costly systematic changes. The Russian elites see modernization narrowly as economic and technological competitiveness. The contributors to this volume see contemporary Russia facing a series of antinomies which are macro-level dilemmas that cannot be abolished either by philosophical mediation or by immediate political decisions. As such, they are the tension fields that constitute choices for various competing agencies. This book will be of interest to scholars and students of Russian studies, transition studies, sociology, social policy, political science, energy policy, cultural studies and stratification studies. Professionals involved in energy, ecology and security policy will also find this publication a rich source.

Assisting Russia's Transition Gianni Zanini, 2002-01-01 This evaluation assesses the development effectiveness of the World Bank's

lending and non lending assistance to the Russian Federation since 1991 a 10 year period of tumultuous political economic and social change This report concludes that an assistance strategy concentrating on analytical and advisory services with limited financial support for Russia would have been more appropriate than one involving large volumes of adjustment lending

Classes in the Transformation of State Socialism David S. Lane,2012-09-25 The year 2011 marks the twentieth anniversary of the end of the Soviet Union This may be an appropriate time to evaluate the adoption by previously state socialist societies of other economic and political models The transition has sometimes been described in positive terms as a movement to free societies with open markets and democratic elections Others have argued that the transition has created weak poverty stricken states with undeveloped civil societies ruled by unresponsive political elites Which is the more accurate assessment David Lane examines a few of the theoretical approaches that help explain the trajectory of change from socialism to

capitalism He focuses on two main approaches in this volume elite theories and social class Theories dwelling on the role of elites regard the transformation from socialism to capitalism as a type of system transfer in which elites craft democratic and market institutions into the space left by state socialism Lane contrasts this interpretation with class based theories which consider transformation in terms of revolution and explain why such theories have not been considered the best way of framing the transition in the post socialist states While recognizing that elites can play important roles and have the capacity to transform societies Lane contends that elite theories alone are inadequate to explain a system change that brings free markets In contrast he proposes a class approach in which two groups characterize state socialism an administrative class and an acquisition class

Land Reform in Russia Stephen K. Wegren, 2009-11-24 This ambitious work is the definitive account of Russia's land reform initiatives from the late 1980s to today In Russia a country controlling more land than any other nation land ownership is central to structures of power class division and agricultural production The aim of Russian land reform for the past thirty years to undo the collectivization of the Soviet era and encourage public ownership has been largely unsuccessful To understand this failure Stephen Wegren examines contemporary land reform policies in terms of legislation institutional structure and human behavior Using extensive survey data he analyzes household behaviors in regard to land ownership and usage based on socioeconomic status family size demographic distribution and regional differences Wegren's study is important and timely as Russian land reform will have a profound effect on Russia's ability to compete in an era of globalization

Neoliberalism Inequality and Authoritarianism Jon Kofas, 2024-09-03 This book exposes the inherent contradictions of neoliberalism The myth of limitless growth ignores the reality of resource constraints and fuels a global upward transfer of wealth Meanwhile a fractured global economy and intensifying class warfare chip away at neoliberalism's foundation As inequality spirals and social justice crumbles the model increasingly serves a privileged few at

the expense of the majority This undermines the Enlightenment ideal of using liberal democracy to improve lives in the age of mass politics threatening neoliberalism s very survival **OECD Economic Surveys: Russian Federation 2013**
