Russian Academicians And The Revolution Combining Professionalism And Politics:

Russian Academicians and the Revolution Vera Tolz, 1997-10-13 An examination of the early Soviet period of the Russian Soviet Academy of Sciences which focuses on the reactions of individual members of the academy to the new situation in which they found themselves after October 1917 Based on the extensive use of documents from the Archives of the Russian Academy of Sciences the author discusses how the academicians justified their cooperation with the Bolsheviks and the ideological basis of the regime's policy towards the academy in the 1920s **The Perversion Of Knowledge** Dr.

Vadim J. Birstein, 2009-09-09 During the Soviet years Russian science was touted as one of the greatest successes of the regime Russian science was considered to be equal if not superior to that of the wealthy western nations The Perversion of Knowledge a history of Soviet science that focuses on its control by the KGB and the Communist Party reveals the dark side of this glittering achievement Based on the author's firsthand experience as a Soviet scientist and drawing on extensive Russian language sources not easily available to the Western reader the book includes shocking new information on biomedical experimentation on humans as well as an examination of the pernicious effects of Trofim Lysenko's pseudo biology Also included are many poignant case histories of those who collaborated and those who managed to resist focusing on the moral choices and consequences The text is accompanied by the author's own translations of key archival materials making this work an essential resource for all those with a serious interest in Russian history **The Soviet**

Pharmaceutical Business During the First Two Decades (1917-1937) Mary Schaeffer Conroy, 2006 Putting privately owned Russian pharmacies and pharmaceutical factories under state control in 1918 1919 did not improve the output and the distribution of soaps disinfectants hormones vitamins and medicines Newly available archival records show that managers appointed by the Soviet government to run sequestered factories employed business methods common to market economies to make the Soviet pharmaceutical sector profitable and productive However an inefficient macroeconomy and interference in day to day policy making in the core industry by exogenous officials frequent reorganization limits on imports and excessive exports hindered production this plus inefficient distribution shorted consumers Inadequate amounts of pharmaceuticals undoubtedly contributed to high mortality during the civil war 1917 1921 collectivization and industrialization 1927 1938 and World War II 1939 1945 **Handbook of Ancient Afro-Eurasian Economies** Sitta

Reden, 2019-12-02 The notion of the Silk Road that the German geographer Ferdinand von Richthofen invented in the 19th century has lost attraction to scholars in light of large amounts of new evidence and new approaches The handbook suggests new conceptual and methodological tools for researching ancient economic exchange in a global perspective with a strong focus on recent debates on the nature of pre modern empires The interdisciplinary team of Chinese Indian and Graeco Roman historians archaeologists and anthropologists that has written this handbook compares different forms of economic development in agrarian and steppe regions in a period of accelerated empire formation during 300 BCE and 300 CE It

investigates inter imperial zones and networks of exchange which were crucial for ancient Eurasian connections Volume I provides a comparative history of the most important empires forming in Northern Africa Europe and Asia between 300 BCE and 300 CE It surveys a wide range of evidence that can be brought to bear on economic development in these empires and takes stock of the ways academic traditions have shaped different understandings of economic and imperial development as well as Silk Road exchange in Russia China India and Western Graeco Roman history Soviet Orientalism and the Creation of Central Asian Nations Alfrid K. Bustanov, 2014-11-20 Orientalism the idea that the standpoint of Western writers on the East greatly affected what they wrote about the East the Other applied also in Russia and the Soviet Union where the study of the many exotic peoples incorporated into the Russian Empire often in quite late imperial times became a major academic industry where as in the West the standpoint of writers greatly affected what they wrote Russian Soviet orientalism had a particularly important impact in Central Asia where in early Soviet times new republics later states were created often based on the distorted perceptions of scholars in St Petersburg and Moscow and often cutting across previously existing political and cultural boundaries The book explores how the Soviet orientalism academic industry influenced the creation of Central Asian nations It discusses the content of oriental sources and discourses considers the differences between scholars working in St Petersburg and Moscow and those working more locally in Central Asia providing a rich picture of academic politics and shows how academic cultural classification cemented political boundaries often in unhelpful ways **Ivan Pavlov** Daniel P. Todes, 2022 Winter at Koltushi Certainty religious and scientific The haunted factory Pavlov's quest Come the Bolsheviks Nervous types Year of climaxes Final reflections Stalin and the Soviet Science Wars Ethan Pollock, 2021-05-11 Between 1945 and 1953 while the Soviet Union confronted postwar reconstruction and Cold War crises its unchallenged leader Joseph Stalin carved out time to study scientific disputes and dictate academic solutions He spearheaded a discussion of scientific Marxist Leninist philosophy edited reports on genetics and physiology adjudicated controversies about modern physics and wrote essays on linguistics and political economy Historians have been tempted to dismiss all this as the megalomaniacal ravings of a dying dictator But in Stalin and the Soviet Science Wars Ethan Pollock draws on thousands of previously unexplored archival documents to demonstrate that Stalin was in fact determined to show how scientific truth and Party doctrine reinforced one another Socialism was supposed to be scientific and science ideologically correct and Stalin ostensibly embodied the perfect symbiosis between power and knowledge Focusing on six major postwar debates in the Soviet scientific community this elegantly written book shows that Stalin's forays into scholarship can be understood only within the context of international tensions institutional conflicts and the growing uncertainty about the proper relationship between scientific knowledge and Party dictated truths The nature of Stalin's interventions makes clear that more was at stake than high politics these science wars were about asserting that the Party was rational and modern and about codifying the Soviet worldview in a battle for the hearts and minds of people around the

globe during the early Cold War Ultimately however the effort to develop a scientific basis for Soviet ideology undermined the system's legitimacy

The Eastern International Masha Kirasirova, 2024 The Eastern International traces how the concept East Vostok was used by the world's first communist state and its mediators to project channel and contest power across Eurasia It highlights the roles played in this process by Jewish activists Arab intellectuals and Central Asian politicians and artists

Making Global Knowledge in Local Contexts Katarzyna Kaczmarska, 2020-04-08 This book draws on extensive ethnographic research undertaken in Russia to show how the wider sociopolitical context the political system relationship between the state and academia as well as the contours of the public debate shapes knowledge about international politics and influences scholars' engagement with the policy world Combining an in-depth study of the International Relations discipline in Russia with a robust methodological framework the book demonstrates that context not only bears on epistemic and disciplinary practices but also conditions scholars' engagement with the wider public and policymakers This original study lends robust sociological foundations to the debate about knowledge in International Relations and the social sciences more broadly In particular the book questions contemporary thinking about the relationship between knowledge and politics by situating the university within rather than abstracting it from the political setting The monograph benefits from a comprehensive engagement with Russian language literature in the Sociology of Knowledge and critical reading of International Relations scholarship published in Russia This text will be of interest to scholars and students in International Relations Russian and Post Soviet Studies the Sociology of Knowledge Science and Technology Studies and Higher Education Studies It will appeal to those researching the knowledge policy nexus and knowledge production practices

Russia's Own Orient Vera Tolz, 2011-02-10 Russia's own Orient examines how intellectuals in early twentieth century Russia offered a new and radical critique of the ways in which Oriental cultures were understood at the time Out of the ferment of revolution and war a group of scholars in St Petersburg articulated fresh ideas about the relationship between power and knowledge and about Europe and Asia as mere political and cultural constructs Their ideas anticipated the work of Edward Said and post colonial scholarship by half a century The similarities between the two groups were in fact genealogical Said was indebted via Arab intellectuals of the 1960s who studied in the Soviet Union to the revisionist ideas of Russian Orientologists of the fin de siècle But why did this body of Russian scholarship of the early twentieth century turn out to be so innovative Should we agree with a popular claim of the Russian elites about their country's particular affinity with the Orient There is no single answer to this question The early twentieth century was a period when all over Europe a fascination with things Oriental engendered the questioning of many nineteenth century assumptions and prejudices In that sense the revisionism of Russian Orientologists was part of a pan European trend And yet Tolz also argues that a set of political social and cultural factors which were specific to Russia allowed its imperial scholars to engage in an unusual dialogue with representatives of the empire's non European minorities It is together that they were able to articulate a powerful long

lasting critique of modern imperialism and colonialism and to shape ethnic politics in Russia across the divide of the 1917 revolutions
