Russian And Soviet Battleships:

Russian Patricia Hilliard, 2021-06-21 Russian and Soviet Battleships is the definitive English language overview of Russian and Soviet battleships from the ironclad Petr Velikii of 1869 to Stalin's final projects. Meticulously researched, this work describes and illustrates the design histories, technical details, characteristics, and service histories of the forty seagoing battleships that served in the Russian and Soviet Navies. This is the first book about Russian battleships to draw from Russian language materials, including books and articles published since the collapse of the Soviet Union. Some one hundred drawings of ships and design studies, many specially commissioned for this book, are showcased, as well as one hundred photographs, many of them never published in the west. The author, Stephen McLaughlin, analyzes all aspects of battleship design, from the policy decisions behind their construction to details of fire control and gunnery. He evaluates their strengths and weaknesses compared with foreign contemporaries. In addition, McLaughlin outlines numerous projected battleships and conjectural studies. As he examines the active and often tragic careers of these ships, he reassesses many of the myths and misconceptions associated with Russian ships and the Russian navy. [Russian & Soviet Battleships](#) Stephen

McLaughlin, 2003 Covering the period 1869-1960, this volume provides an overview of Russian and Soviet battleships. It describes the design histories, technical innovations, characteristics, and service histories of 40 naval vessels. Approximately 100 drawings and design studies illustrate the details of the ships. **The Windfall Battleships** Aidan Dodson, 2025-04-22 This new book explores for the first time the full story of how two Turkish and two Chilean battleships became British capital ships after the outbreak of the First World War. Under construction by the shipbuilding giants of Armstrong and Vickers in August 1914, Sultan Osman I, Readiye, Almirante Latorre, and Almirante Cochrane became HM Ships Agincourt, Erin, Canada, and Eagle. The first three served with the Grand Fleet, fighting at Jutland, while the last was transformed into a pioneering aircraft carrier, which would serve with distinction until sunk while escorting a convoy to Malta in 1942. While two of the other ships had short lives, cut short by the Washington Naval Treaty, the final ship, Almirante Latorre, would be returned to Chile after the war for a continuing active career that would last into the 1950s. When finally towed away for scrap in 1959, she was the penultimate survivor of Jutland. Drawing on extensive archival research, the book begins with an overview of the warships under construction around Europe for foreign customers in August 1914 and how the four ships featured were acquired by the Royal Navy. It then looks at them as manifestations of the international rivalries which directed much of the national budgets of impecunious South American and Balkan states towards armaments. The focus then switches to the British service of the ships actually completed as battleships and then to the story of the carrier. Although never finished as a battleship, she would play a crucial role in the development of British carrier aviation. Finally, the author traces the stories of the battleships of the Latin American naval race from the 1920s down to the 1950s. The stories and back stories of Agincourt, Erin, Canada, and Eagle embrace almost the whole of the twentieth-century battleship era, and they take us down the byways

of international naval power ranging from the Pacific to the Black Sea and from the line of battle to mutiny and revolution A fascinating and original story *The British Battleship* Norman Friedman, 2015-10-15 Norman Friedman brings a new perspective to an ever popular subject in *The British Battleship 1906 1946* With a unique ability to frame technologies within the context of politics economics and strategy he offers unique insight into the development of the Royal Navy capital ships With plans of the important classes commissioned from John Roberts and A D Baker III and a color section featuring the original Admiralty draughts this book offers something to even the most knowledgeable enthusiast **Warship 2024** , 2024-05-09 The 2024 edition of *Warship* the celebrated annual publication featuring original research on the history development and service of the world's warships For over 45 years *Warship* has been the leading annual resource on the design development and deployment of the world's combat ships Featuring a broad range of articles from a select panel of distinguished international contributors this latest volume combines original research new book reviews warship notes an image gallery and much more maintaining the impressive standards of scholarship and research with which *Warship* has become synonymous Detailed and accurate information is the hallmark of all the articles which are fully supported by plans data tables and stunning photographs This year's *Warship* includes features on Imperial Japan's Matsu and Tachibana destroyer classes the Italian CRDA midget submarines France's 1960s missile frigates Suffren and Duquesne and Germany's sailing raider of World War I *Seeadler* **The Kaiser's Battlefleet** Aidan Dodson, 2016-11-30 This illustrated study of the German Imperial Navy presents a ship by ship history from the dreadnaught era through WWI The battleships of the Third Reich have been written about exhaustively but there is little in English devoted to their predecessors of the Second Reich In *The Kaiser's Battlefleet* Aidan Dodson fills this significant gap in German naval history by covering these capital ships and studying the full span of battleship development during this period *Kaiser's Battlefleet* presents a chronological narrative that features technical details construction schedules and the ultimate fates of each ship tabulated throughout With a broad synthesis of German archival research Dodson provides fresh data and corrects significant errors found in standard English language texts Heavily illustrated with line work and photographs drawn from German sources this study will appeal to historians of WWI German as well as battleship modelmakers **What Happened to the Battleship** Chris Baker, 2022-07-30 In the hundreds of books written about battleships the authors tend to draw down the curtain on the careers of these great vessels in September 1945 with the surrender of Japan Yet on that day some ninety eight battleships or ex battleships might be spotted around the world and eleven of them were in or around Tokyo Bay for the surrender itself What happened to all those ships This new book takes a fresh look at the slow demise of the battleship It examines the decisions made by the major world powers after 1945 and their aspirations to retain battleships in their navies despite financial stringency It places the history and role of battleships after 1945 in their geo political context centered around the Cold War and the need for the West to face down an aggressive Soviet Union It also examines the impact on battleships of

operational analysis of the Second World War and new technological developments notably the atom bomb and the guided missile The book uses the wealth of information from ship s books ship s logs and gun logs to document in considerable detail what the ships actually did after the Second World War with a particular focus on those of the Royal Navy It covers United States battleship operations in Korea Vietnam and the Gulf War as well as the deterrent role played by battleships for NATO from the 1950s to the 1990s Finally it brings the story up to date by documenting the preservation as museum ships of the eight dreadnoughts which still exist today in the United States Extensively illustrated with photographs of the huge range of activities of battleships after 1945 from their use as Fleet flagships to Royal or Presidential yachts and more poignantly as target ships this new book will appeal equally to the historic ship enthusiast and naval specialist and provide a novel perspective through a battleship shaped lens on late twentieth century history for the more general reader **Stalin's**

Ocean-going Fleet: Soviet Jurgen Rohwer,2017-07-05 In this work two senior naval historians analyze the discussions held in leading Soviet political military and naval circles concerning naval strategy and the decisions taken for warship building programmes They describe the reconstitution of the fleet under difficult conditions from the end of the Civil War up to the mid 1920s leading to a change from classical naval strategy to a Jeune ecole model in the first two Five Year Plans including efforts to obtain foreign assistance in the design of warships and submarines Their aim is to explain the reasons for the sudden change in 1935 to begin building a big ocean going fleet After a period of co operation with Germany from 1939 41 the plans came to a halt when Hitler attacked the Soviet Union in 1941 Finally this work covers the reopening of the naval planning processes in 1944 and 1945 and the discussions of the naval leadership with Stalin the party and government officials about the direction of the new building programmes as the Cold War began *Warship 2023* ,2023-05-25 The latest edition of Warship the celebrated annual publication featuring the latest research on the history development and service of the world s warships For over 45 years Warship has been the leading annual resource on the design development and deployment of the world s combat ships Featuring a broad range of articles from a select panel of distinguished international contributors this latest volume combines original research new book reviews warship notes an image gallery and much more maintaining the impressive standards of scholarship and research with which Warship has become synonymous Detailed and accurate information is the keynote of all the articles which are fully supported by plans data tables and stunning photographs This year s Warship includes features on the secret battleship design that Mussolini s Fascist Italy sold to Stalin s USSR the little known German flak ships of World War II the French aircraft carriers Clemenceau and Foch and the development of electronic warfare in the Royal Navy [The Kaiser's Cruisers, 1871-1918](#) Aidan Dodson,2023-01-04 While bookshelves groan with works on the capital ships of the German Third Reich there is little in English devoted to their predecessors of the Second Reich so this new book will fill a clear gap in its study of German cruisers of the period from wooden hulled corvettes through the fusion of overseas and home vessels into the modern small cruisers that evolved and

fought in the First World War The book covers the full range of cruising vessels operated or ordered by the Imperial German Navy between 1871 and 1918 excluding the large cruisers previously covered by the author s companion volume The Kaiser s Battlefleet These include corvettes avisos sloops torpedo cruisers III and IV class cruisers and small cruisers and are described and arranged in a chronological narrative This includes both design and operational histories the latter continuing down to the end of ships service after the fall of Imperial Germany and it is accompanied by an extensive selection of many rare photographs The ships technical details are tabulated in the second half of the book which also includes sketches of ships internal layouts and armour and changes in appearance over time The authors have made extensive use of archival material particularly relating to the political and technical background to design and procurement and present a developmental history of this ship class which is unique in the English language It will have huge appeal to all those with an interest in the German navy and to those who have been waiting avidly for the sequel to The Kaiser s Battlefleet
