Owning Russia Andrew S. Barnes,2018-07-05 During and after the breakdown of the Soviet Union a wide range of competitors fought to build new political and economic empires by wresting control over resources from the state and from each other In the only book to examine the evolution of Russian property ownership in both industry and agriculture Andrew Barnes uses interviews archival research and firsthand observation to document how a new generation of capitalists gained control over key pieces of the Russian economy by acquiring debt ridden factories and farms once owned by the state He argues that although the Russian government made policies that affected how actors battled one another it could never rein in the most destructive aspects of the struggle for property Barnes shows that dividing the spoils of the Soviet economy involved far more than the experiment with voucher privatization or the scandalous behavior of a few Moscow based oligarchs In Russia the control of property yielded benefits beyond mere profits and these high stakes fueled an intense enduring and profound conflict over real assets This fierce competition empowered the Russian executive branch at the expense of the legislature dramatically strengthened managers in relation to workers created a broad array of business conglomerates and fundamentally shaped regional politics not only blurring the line between government and business but often erasing it

Arts & Humanities* Institute for Scientific Information, 2001 **Social Change and Modernization** Bruno Grancelli, 2011-06-24 No detailed description available for Social Change and Modernization *The BRICs and Emerging Economies in Comparative Perspective* Uwe Becker, 2013-10-23 In the past ten to twenty years the global political economy picture has dramatically changed with the emergence of the economies of Brazil Russia India and notably China BRICs as big players and competitors of the advanced economies in the West and Eastern Asia The book comparatively analyses institutional change in the BRICs This book examines the BRICs by analysing their institutional development their main continuities and changes and their differences It provides a comparative analysis of the political economies of the BRICs but also considers South Africa and Turkey The contributors provide a systematic comparison of the state economy and the capital labour relationships and explore whether they liberalized or followed a specific trajectory The book also addresses debates on the varieties of capitalism and explores whether the emerging economies fit into the dichotomous construction of liberal and coordinated capitalism or whether they require a more differentiated typological approach Moving away from rigid conceptions and the static classification of political economies as either liberal or coordinated and presenting a more open approach The BRICs and Emerging Economies in Comparative Perspective will be vital reading for students and scholars of comparative political economy international relations capitalism the BRICs emerging markets and the role of the state in the economy **Russian Transformations** Leo McCann, 2004-07-31 The transition of Russia to a developed market economy has been slower more contradictory and less predictable than expected This book examines contemporary Russian socio economic development and explores the degree to which Russian experiences can be incorporated into current social science theories In particular it questions how far the concept of globalization is applicable to the situation in Russia The Politics of Equity Finance in Emerging Markets Department of Political Science Case Western Reserve University Kathryn C. Lavelle Professor, 2004-09-24 Emerging market stock issuance relative to GDP rose in the late twentieth century to levels that roughly matched that of advanced industrial markets Nonetheless the connection between owning shares of emerging market stock and the ability to influence the management of these firms remains fundamentally different from the analogous institutional connection that has evolved in industrial markets The reasons for the differences in emerging markets are both historical and political in nature That is local equity markets have had the objective of providing for some degree of local ownership and control of large economic entities since the late nineteenth century However local markets have operated under different global political structures since that time ranging from imperialism to world wars to sovereign developmental states to neo liberal states Shares issued under these different structures have been reconfigured over time resulting in a lack of convergence along either the Anglo American or Continental models of corporate governance The author uses a political science paradigm to explain the growth of emerging equity markets She departs from conventional economic

explanations and examines politics at the micro level of large issues of emerging market stock The second half of the book presents case studies dealing with emerging market countries in Latin America Asia Russia and Eastern Europe Africa and the Middle East The case studies connect the regional state and firm levels to detail the multiple ownership and control arrangements and to dispel the notion that mere quantitative growth of these markets will lead to a convergence in financial institutional structures along the lines of the industrial core of the world economy

Democracy After Communism Larry Diamond, Marc F. Plattner, 2002-09-23 The last quarter of the twentieth century was marked by two dramatic political trends that altered many of the world's regimes the global resurgence of democracy and the collapse of communism Was the process that brought down communism in Eastern Europe and the former Soviet Union fundamentally different from the process that gave birth to new democracies in other regions of the world Were the transitions away from communism mostly like or mostly unlike the transitions away from authoritarianism that took place elsewhere Is the challenge of building and consolidating democracy under postcommunist conditions unique or can one apply lessons learned from other new democracies The essays collected in this volume explore these questions while tracing how the countries of Eastern Europe and the former Soviet Union have fared in the decade following the fall of communism Contributors Anders slund Carnegie Endowment for International Peace in Washington D C Leszek Balcerowicz Warsaw School of Economics Archie Brown Oxford University and St Antony's College Zbigniew Brzezinski Johns Hopkins

Restructuring of the Economic Elites after State Socialism Jochen Tholen, David Lane, Gyorgy Lengyel, 2012-02-24 The collapse of the former socialist states has led to the transformation of their political economic and social systems as well as a major change in international orientations In this context new economic and political elites of the former state socialist societies have emerged How they have emerged from state socialism is a major component of this book which has two major themes First we consider the recruitment patterns of the new elites among others the extent to which the new leaderships have been reconstituted from the former cadres of state socialism Second we outline the consequences of transformation on the institutions particularly the formation of markets and privatisation in the context of the dynamic of the enlargement of the European Union and the entry of the new states into the world system This collection of papers is based mostly on two conferences out of six serial conferences under the general responsibility of David Lane Cambridge University The first conference was held in Budapest on 4 5 September 2004 at Corvinus University of Budapest Institute of Sociology and Social Policy Centre for Empirical Social Research and organized by Gyrgy Lengyel the second on 13 14 May 2005 at University of Bremen Institute of Sociology Institute Labour and Economy led by Jochen Tholen
