**Democracy and Political Culture in Eastern Europe** Hans-Dieter

Klingemann, Dieter Fuchs, Jan Zielonka, 2006-11-22 What is the relationship between democracy and political culture in countries undergoing major systemic change Have subjective political orientations of citizens been important in shaping the development of democracy in central and eastern Europe after the fall of communism These core questions are tackled by an impressive range of twenty political scientists sixteen of which are based in the central and eastern European countries covered in this essential new book Their analyses draw on a unique set of data collected and processed by the contributors to this volume within the framework of the World Values Survey project This data enables these authors to establish similarities and differences in support of democracy between a large number of countries with different cultural and structural conditions as well as historical legacies The macro level findings of the book tend to support the proposition that support of democracy declines the further east one goes In contrast micro level relationships have been found to be astonishingly similar For example support of democracy is always positively related to higher levels of education no matter where an individual citizen happens to live This new book builds a clear understanding of what makes democracies strong and resistant to autocratic temptation

postcolonial and neo colonial configurations of power and influence This book proposes new critical perspectives on several themes and concepts that have emerged within or been propagated by postcolonial studies These themes include structures of exclusion inclusion formations of nationalism structures of othering and representations of difference forms and historical realisations of anti colonial anti imperial struggle the experience of trauma involving issues of collective memory amnesia and the re writing of history resistance as a complex of cultural practices and concepts such as alterity ambivalence self colonisation dislocation hegemonic discourse minority and subaltern cultures Taken together this volume suggests that some of the methodological instruments of postcolonial criticism can be fruitfully applied to the study of postcommunist cultures and conversely that the experience of the Soviet brand of imperialist rule in the form of communism in East Central Europe can function as an ideological moderator in Third World oriented Marxist inspired postcolonial discourses This book was originally published as a special issue of the Journal of Postcolonial Writing *New Women's Writing in Russia, Central and Eastern Europe* Rosalind Marsh, 2020-12-07 Since the late 1980s there has been an explosion of women's writing in Russia Central and Eastern Europe greater than in any other cultural period This book which contains contributions by scholars and writers from many different countries aims to address the gap in literature and debate that exists in relation to this subject We investigate why women's writing has become so prominent in post socialist countries and enquire whether writers regard their gender as a burden or on the contrary as empowering We explore the relationship in contemporary women's writing between gender class and nationality as well as issues of ethnicity and post colonialism **Eastern Europe** United States. *Central and Eastern European Literary Theory and the West* Michał Mrugalski, Schamma Schahadat, Irina Wutsdorff, 2022-12-05 Literary theory flourished in Central and Eastern Europe throughout the twentieth century but its relation to Western literary scholarship is complex This book sheds light on the

entangled histories of exchange and influence both within the region known as Central and Eastern Europe and between the region and the West. The exchange of ideas between scholars in the East and West was facilitated by both personal and institutional relations both official and informal encounters. For the longest time however intellectual exchange was thwarted by political tensions that led to large parts of Central and Eastern Europe being isolated from the West. A few literary theories nevertheless made it into Western scholarly discourses via exiled scholars. Some of these scholars such as Mikhail Bakhtin become widely known in the West and their thought was transposed onto new Western cultural contexts others such as Olga Freidenberg were barely noticed outside of Russian and Poland. This volume draws attention to the schools, circles and concepts that shaped the development of theory in Central and Eastern Europe as well as the *histoire croisée* the history of translations, transformations and migrations that conditioned its relationship with the West.

*The Reception of Byzantium in European Culture since 1500* Przemysław Marciniak, Dion C. Smythe, 2017-05-15

Studies on the reception of the classical tradition are an indispensable part of classical studies. Understanding the importance of ancient civilization means also studying how it was used subsequently. This kind of approach is still relatively rare in the field of Byzantine Studies. This volume which is the result of the range of interests in mostly non-English speaking research communities takes an important step to filling this gap by investigating the place and dimensions of Byzantium after Byzantium. This collection of essays uses the idea of reception theory and expands it to show how European societies after Byzantium have responded to both the reality and the idea of Byzantine Civilisation. The authors discuss various forms of Byzantine influence in the post-Byzantine world from architecture to literature to music to the place of Byzantium in modern political debates e.g. in Russia. The intentional focus of the present volume is on those aspects of Byzantine reception less well known to English reading audiences which accounts for the inclusion of Bulgarian, Czech, Polish and Russian perspectives. As a result this book shows that although so-called Byzantinism is a pan-European phenomenon it is made manifest in local national versions. The volume brings together specialists from various countries mainly Byzantinists whose works focus not only on Byzantine Studies that is history, literature and culture of the Byzantine Empire but also on the influence of Byzantine culture on the world after the Fall of Constantinople.
