Destination in Doubt Stephen Lovell,2013-04-04 The enormously complex changes triggered by the collapse of communism in Eastern Europe were nowhere more ambiguous than in the heartland of the Soviet bloc Russia itself Here the population was divided on all the most fundamental questions of post communist transition economic reforms the Communist Party the borders of the state even the definition of the Russian nation itself Russians also faced plummeting living standards

and chronic uncertainty In a matter of months Russia was apparently demoted from evil empire to despondent poor relation of the prosperous West Yet the country also seemed alarmingly open to all manner of political outcomes Russia deserves our attention now as much as ever because it raises so many of the big questions about how societies operate in the modern world

The Company of Strangers Paul Seabright, 2010-04-12 The Company of Strangers shows us the remarkable strangeness and fragility of our everyday lives This completely revised and updated edition includes a new chapter analyzing how the rise and fall of social trust explain the unsustainable boom in the global economy over the past decade and the financial crisis that succeeded it Drawing on insights from biology anthropology history psychology and literature Paul Seabright explores how our evolved ability of abstract reasoning has allowed institutions like money markets cities and the banking system to provide the foundations of social trust that we need in our everyday lives Even the simple acts of buying food and clothing depend on an astonishing web of interaction that spans the globe How did humans develop the ability to trust total strangers with providing our most basic needs

Informal Order and the State in Afghanistan Jennifer Brick Murtazashvili, 2016-04-21 Despite vast efforts to build the state profound political order in rural Afghanistan is maintained by self governing customary organizations Informal Order and the State in Afghanistan explores the rules governing these organizations to explain why they can provide public goods Instead of withering during decades of conflict customary authority adapted to become more responsive and deliberative Drawing on hundreds of interviews and observations from dozens of villages across Afghanistan and statistical analysis of nationally representative surveys Jennifer Brick Murtazashvili demonstrates that such authority enhances citizen support for democracy enabling the rule of law by providing citizens with a bulwark of defence against predatory state officials Contrary to conventional wisdom it shows that traditional order does not impede the development of the state because even the most

independent minded communities see a need for a central government but question its effectiveness when it attempts to rule them directly and without substantive consultation Ethnic Politics after Communism Zoltan Barany, Robert G.

Moser, 2018-07-05 The Soviet Union encompassed dozens of nationalities and ethnicities and in the wake of its collapse the politics of ethnicity within its former borders and throughout Eastern Europe have undergone tremendous changes In this book Zoltan Barany and Robert G Moser bring together eminent scholars whose theoretically diverse and empirically rich research examines various facets of ethnicity in postcommunist Europe and Eurasia ethnic identity and culture mobilization parties and voting conflict and ethnic migration The contributors consider how ethnic forces have influenced political outcomes that range from voting to violence and protest mobilization to language acquisition Conversely each chapter demonstrates that political behavior itself has an impact on the forms and strength of ethnic identity Thus ethnicity is deemed to be a contested malleable and constructed force rather than a static characteristic inherent in the attributes of groups and individuals with a common religion race or national origin Organised Crime in Europe Cyrille Fijnaut, Letizia Paoli, 2007-01-21 This volume represents the first attempt to systematically compare organised crime concepts as well as historical and contemporary patterns and control policies in thirteen European countries These include seven old EU Member States Denmark France Germany Italy The Netherlands Spain and the United Kingdom two new members the Czech Republic and Poland a candidate country Turkey and three non EU countries Albania Russia and Switzerland Based on a standardised research protocol thirty three experts from different legal and social disciplines provide insight through detailed country reports On this basis the editors compare organised crime patterns and policies in Europe and assess EU initiatives against organised crime Its informed analyses and unprejudiced assessments will make Organised Crime in Europe an indispensable resource for scholars students practitioners and policy makers interested in understanding the complex phenomenon of organised crime and its related control policies in Europe **Oceans and Human Health** Robert E.

Bowen, Michael H. Depledge, Cinnamon P. Carlarne, Lora E. Fleming, 2014-04-03 Human health and well being are tied to the vitality of the global ocean and coastal systems on which so many live and rely We engage with these extraordinary environments to enhance both our health and our well being But we need to recognize that introducing contaminants and otherwise altering these ocean systems can harm human health and well being in significant and substantial ways These are complex challenging and critically important themes How the human relationship to the oceans evolves in coming decades may be one of the most important connections in understanding our personal and social well being Yet our understanding of this relationship is far too limited This remarkable volume brings experts from diverse disciplines and builds a workable understanding of breadth and depth of the processes both social and environmental that will help us to limit future costs and enhance the benefits of sustainable marine systems In particular the authors have developed a shared view that the global coastal environment is under threat through intensified natural resource utilization as well as changes to global climate and

other environmental systems All these changes contribute individually but more importantly cumulatively to higher risks for public health and to the global burden of disease This pioneering book will be of value to advanced undergraduate and postgraduate students taking courses in public health environmental economic and policy fields Additionally the treatment of these complex systems is of essential value to the policy community responsible for these questions and to the broader audience for whom these issues are more directly connected to their own health and well being The seas across this planet and their effects on human society and its destiny are a fascinating subject for analysis and insights derived from intellectual inquiry This diverse and complex subject necessarily requires a blending of knowledge from different disciplines which the authors of this volume have achieved with remarkable success The following pages in this volume are written in a lucid and very readable style and provide a wealth of knowledge and insightful analysis which is a rare amalgam of multi disciplinary perspectives and unique lines of intellectual inquiry It is valuable to get a volume such as this which appeals as much to a non specialist reader as it does to those who are specialists in the diverse but interconnected subjects covered in this volume

empirically based computational social science It is based on a wealth of qualitative data regarding multiple extortion rackets such as the Sicilian Mafia an international money laundering organisation and a predatory extortion case in Germany Computational methods are used for data analysis to help in operationalising data for use in agent based models and to explore structures and dynamics of extortion racketeering through simulations In addition to textual data sources stakeholders and experts are extensively involved providing narratives for analysis and qualitative validation of models The book presents a systematic application of computational social science methods to the substantive area of extortion racketeering The reader will gain a deep understanding of extortion rackets in particular their entrenchment in society and processes supporting and undermining extortion rackets Also covered are computational social science methods in particular computationally assisted text analysis and agent based modelling and the integration of empirical theoretical and computational social science

The Puzzle of Prison Order David Skarbek, 2020 Many people think prisons are all the same rows of cells filled with violent men who officials rule with an iron fist Yet life behind bars varies in incredible ways In some facilities prison officials govern with care and attention to prisoners needs In others officials have remarkably little influence on the everyday life of prisoners sometimes not even providing necessities like food and clean water Why does prison social order around the world look so remarkably different In *The Puzzle of Prison Order* David Skarbek develops a theory of why prisons and prison life vary so much He finds that how they are governed sometimes by the state and sometimes by the prisoners matters the most He investigates life in a wide array of prisons in Brazil Bolivia Norway a prisoner of war camp England and Wales women's prisons in California and a gay and transgender housing unit in the Los Angeles County Jail to understand the hierarchy of life on the inside Drawing on economics and a vast empirical literature on legal systems Skarbek offers a framework to not only understand why life on the inside varies in such fascinating and novel ways but also how social order evolves and takes root behind bars

The Wild East Barbara Harriss-White, Lucia Michelutti, 2019-09-23 The *Wild East* bridges political economy and anthropology to examine a variety of illegal economic sectors and businesses such as red sanders coal fire oil sand air spectrum land water real estate procurement and industrial labour The 11 case studies based across India Pakistan and Bangladesh explore how state regulative law is often ignored and or selectively manipulated The emerging collective narrative shows the workings of regulated criminal economic systems where criminal formations politicians police judges and bureaucrats are deeply intertwined By pioneering the field study of the politicisation of economic crime and disrupting the wider literature on South Asia's informal economy The *Wild East* aims to influence future research agendas through its case for the study of mafia enterprises and their engagement with governance in South Asia and outside Its empirical and theoretical contribution to debates about economic crimes in democratic regimes will be of critical value to researchers in Economics Anthropology Sociology Comparative Politics Political Science and International Relations Criminologists and Development Studies as well as to those inside and outside academia interested in current
