financial sector in the context of ongoing challenges such as the evolution of forms of money and the processes of currency competition the outbreak of financial and economic crises the accumulation of foreign exchange reserves financial innovations the scale of securitisation and monetary integration Although safe assets are not a new category of financial assets they are inherently connected with the evolution of money Thus this book examines the determinants of their creation motives of holding and the consequences of a shortage all within the changing nature of the international financial system Historical political and institutional backgrounds are taken into account This book will appeal to researchers scholars and advanced students of macroeconomics international finance and economics investment analysis financial economics and econometrics
