Semiconductor Safety Handbook Safety And Health In The Semiconductor Industry:

Semiconductor Safety Handbook Richard A. Bolmen,1998-12-31 Interwoven within our semiconductor technology development had been the development of technologies aimed at identifying evaluating and mitigating the environmental health and safety EH S risks and exposures associated with the manufacturing and packaging of integrated circuits Driving and advancing these technologies have been international efforts by SEMI s Safety Division the Semiconductor Safety Association SSA and the Semiconductor Industry Association SIA The purpose of the Semiconductor Safety Handbook is to provide a current single source reference for many of the primary semiconductor EH S technologies and disciplines To this end the contributors have assembled a comprehensive text written by some of the leading experts in EH S in the semiconductor industry This text had taken three years to complete and has involved tremendous effort and commitment by the authors They have attempted to construct a reference manual that is comprehensive in its coverage of the technical aspects of each individual subject while at the same time addressing practical applications of each topic The scope of this text from its inception was intended to address significantly more than what would typically be classified under the definition of safety However all of the chapters have a direct application to the protection and preservation of semiconductor employees the surrounding communities and the environment This book is a hands on reference to environmental health and safety issues critical to the semiconductor industry It was also the author s intent to produce a text that provides a practical user s guide for semiconductor environmental health and safety practitioners as well as those individuals responsible for operation maintenance and production in wafer fabrication facilities

Semiconductor Safety Handbook Richard A. Bolmen,1998-12-31 It should also be of interest to semiconductor health and safety consultants insurance companies and insurance brokers specializing in high technology risks
