reprinted from *The Monist* 34 1893 and *Sense Meaning and Interpretation* reprinted from *Mind* 5 17 and 18 1896 and a selection of several noteworthy and unpublished essays In the introduction to this volume the editor H Walter Schmitz exemplifies how Lady Welby developed her signification in discussion and cooperation with numerous highly divergent scientists and scholars of her times how her ideas influenced other scholars in Europe and the US and how signification sank to near oblivion and was finally recovered

Interdisciplinary Phenomenology D. Ihde, Richard M. Zaner, 2013-06-29 Historically philosophy has been the point of origin of the various sciences However once developed the sciences have increasingly become autonomous although often taking some paradigm from leading philosophies of the era As a result in recent times the relationship of philosophy to the sciences has been more by way of dialogue and critique than a matter of spawning new sciences This volume of the *Selected Studies* brings together a series of essays which develop that dialogue and critique with special reference to the insights of phenomenological philosophy Phenomenology in its own way has been interfaced with the sciences from its outset Perhaps the most widely noted relation due in part to Edmund Husserl's characterization of the beginning steps of phenomenology as a descriptive psychology has been with the various psychologies It is well known that the early Gestaltists were influenced by Husserl and later the Existential psychologies acknowledged the impact of Martin Heidegger and Jean Paul Sartre to mention but two philosophers And of course Husserl's lifetime concern for the foundations of logic and mathematics especially as these the former in particular were developed into a foundational theory of science has figured prominently in these dialogues

2 INTRODUCTION Less directly but more currently the impact of phenomenology upon the disciplines has begun to be felt in a whole range of the sciences

Signifying and Understanding Susan Petrilli, Lady Victoria Welby, 2009 This book introduces and provides commentary on a selection of published and unpublished works by Victoria Welby and exponents of the Signific Movement in the Netherlands Beyond offering an important contribution to the reconstruction of a neglected phase in the history of ideas it evidences the theoretical topicality of signification in particular the focus on the relation of signs to value meaning and understanding on verbal and nonverbal behavior and on language and communication

The Significance of Sense Roger Wertheimer, 1972

Essays on Signification H. Walter Schmitz, 1990 Signification is one of those by no means exclusively sign theoretically relevant movements which arose at the turn of the century It established a philosophical tradition which from its very inception was interlaced with widely varying movements ranging for example from Bresson's semantics to Carnap's and Neurath's logical empiricism In this volume an international group of well known scholars from various disciplines undertakes a broad re-evaluation of signification and its development which promises also to yield a better knowledge of research approaches in linguistics semiotics philosophy and psychology with which signification was related or vied for acceptance Contributions deal with Lady Welby's biography and socio-cultural background the intellectual context of the signification movement at the turn of the century and the relationships between Welby's semiotic and philosophical ideas on the one hand and those of her contemporaries Bresson Peirce Schiller Vailati etc

Dominic Lash,2020-07-06 Precisely perhaps because they are so immediately absorbing narrative films can also be profoundly confusing and disorienting This fascinating book neither proposes foolproof methods for avoiding confusion nor does it suggest that disorientation is always a virtue Instead it argues that the best way to come to terms with our confusion is to look closely at exactly what is confusing us and why At the heart of the book are original close readings of four important recent films David Lynch s INLAND EMPIRE 2006 Leos Carax s Holy Motors 2012 Pedro Costa s Colossal Youth 2006 and Jean Luc Godard s Goodbye to Language 2014 Clearly written but critically and theoretically bold The Cinema of Disorientation Inviting Confusions explores both how we get or fail to get our bearings with respect to a film and what we might discover by and while doing so **Signs of Humanity / L'homme et ses signes** Gérard Deledalle,Michel
