Language, Cognition, and Deafness Michael Rodda,Carl Grove,2013-08-21 First published in 1987 This book is intended as an introduction to the field of communication and deafness with particular reference to cognition and the various forms of language used by hearing impaired people It is aimed at an audience comprising teachers and student teachers of the deaf speech pathologists and students of speech pathology social workers and students of social work psychologists and students of psychology and to some extent the parents of deaf children and deaf people themselves It attempts to provide a concise summary of the topic and indeed as well as being for the audience just described it will be useful to anyone with an interest in the psychological sociological and linguistic ramifications of hearing loss *The Oxford Handbook of Deaf Studies in Learning and Cognition* Marc Marschark,Harry Knoors,2020-04-15 In recent years the intersection of cognitive psychology developmental psychology and neuroscience with regard to deaf individuals has received increasing attention from a variety of academic and educational audiences Both research and pedagogy have addressed questions about whether deaf children learn in the same ways that hearing children learn how signed languages and spoken languages might affect different aspects of cognition and cognitive development and the ways in which hearing loss influences how the brain processes and retains information There are now a number of preliminary answers to these questions but there has been no single forum in which research into learning and cognition is brought together The Oxford Handbook of Deaf Studies in Learning and Cognition aims to provide this shared forum focusing exclusively on learning cognition and cognitive development from theoretical psychological biological linguistic social emotional and educational perspectives Each chapter includes state of the art research conducted and reviewed by international experts in the area Drawing this research together this volume allows for a synergy of ideas that possesses the potential to move research theory and practice forward Oxford Handbook of Deaf Studies, Language, and Education Marc Marschark,Patricia Elizabeth Spencer,2005 This title is a major professional reference work in the field of deafness research It covers all important aspects of deaf studies language social psychological issues neuropsychology culture technology and education *Educating Deaf Students* Marc Marschark,Harry G. Lang,John Anthony Albertini,2006 **Teaching Deaf Learners** Harry Knoors PhD,Marc Marschark,2014-01-22 Teaching Deaf Learners Psychological and Developmental Foundations explores how deaf students children and adolescents learn and the conditions that support their reaching their full cognitive potential or not Beginning with an introduction to teaching and learning of both deaf and hearing students Knoors and Marschark take an ecological approach to deaf education emphasizing the need to take into account characteristics of learners and of the educational context Building on the evidence base with respect to developmental and psychological factors in teaching and learning they describe characteristics of deaf learners which indicate that teaching deaf learners is not or should not be the same as teaching hearing learners In this volume

Knoors and Marschark explore factors that influence the teaching of deaf learners including their language proficiencies literacy and numeracy skills cognitive abilities and social emotional factors These issues are addressed in separate chapters with a focus on the importance to all of them of communication and language Separate chapters are devoted to the promise of multimedia enhanced education and the possible influences of contextual aspects of the classroom and the school on learning by deaf students The book concludes by pointing out the importance of appropriate education of teachers of deaf learners given the increasing diversity of those students and the contexts in which they are educated It bridges the gap between research and practice in teaching and outlines ways to improve teacher education

Figurative Language Comprehension Herbert L. Colston, Albert N. Katz, 2004-12-13 Figurative language such as verbal irony metaphor hyperbole idioms and other forms is an increasingly important subfield within the empirical study of language comprehension and use *Figurative Language Comprehension Social and Cultural Influences* is an edited scholarly book that ties together recent research concerning the social and cultural influences on figurative language cognition These influences include gender cultural differences economic status and inter group effects among others The effects these influences have on people's use comprehension and even processing of figurative language comprise the main theme of this volume No other book offers such a look at the social and cultural influences on a whole family of figurative forms at several levels of cognition This volume is of great interest to scholars and professionals in the disciplines of social and cognitive psychology psycholinguistics and second language acquisition as well as cognitive and other fields of linguistics where scholars have interests in pragmatics metaphor symbol discourse and narrative Some knowledge of the empirical and experimental methods used in language research as well as some familiarity with theories underlying the use comprehension and processing of figurative language would be helpful to readers of this book

Analyzing Syntax and Semantics Virginia A. Heidinger, 1984 On adoption of the materials the teacher may request the Instructor's Manual and Test Packet These aids are free and have teaching guidelines and a set of tests for each of the chapters complete with answer keys

Context, Cognition, and Deafness M. Diane Clark, Marc Marschark, Michael A. Karchmer, 2001 This sharply focused volume on the cognitive development of deaf children calls upon experts in anthropology psychology linguistics basic visual sensory processes education cognition and neurophysiology to share complementary observations William C Stokoe's *Deafness Cognition and Language* leads fluidly into Jeffery P Braden's analysis of clinical assessments of deaf people's cognitive abilities Margaret Wilson expands on the impact of sign language expertise on visual perception The study and analysis of Italian deaf preschoolers with hearing families presented by Elena Pizzuto Barbara Ardito Maria Cristina Caselli and Virginia Volterra chronicles fascinating insights on the children's cognition and language development *Context Cognition and Deafness* also shows that theory can intersect practice as displayed by editor Marschark and Jennifer Lukomski in their research on literacy cognition and education Amy R Lederberg and Patricia E Spencer have combined sequential designs in their study of

vocabulary learning Ethan Remmel Jeffrey Bettger and Amy Weinberg explore the theory of mind development The emotional development of deaf children also receives detailed consideration by Colin D Gray Judith A Hosie Phil A Russell and Ellen A Ormel Kathryn P Meadow Orlans delineates her perspective on the coming of age of deaf children in relation to their education and development Marschark concludes with insightful impressions on the future of theory and application an appropriate close to this exceptional coherent volume

Luetke-Stahlman, John Luckner, 1991 **Remarkable Conversations** Barbara Miles, Marianne Riggio, 1999 This book addresses the needs of children of all abilities from those who use nonlinguistic forms of communication such as objects or body movements to those who use linguistic forms such as sign language or writing

Teaching Hearing-impaired Children in Regular Classrooms Peter M. Blackwell, 1983 This guide is designed to assist regular classroom teachers in helping the hearing impaired child to master the English language It is noted that the hearing impaired population is not homogenous Different factors involved in the decision to place a hearing impaired child in a regular classroom are considered The types of language problems hearing impaired children experience are enumerated including problems with the function and structure of language The need for a comprehensive assessment and the development of an individualized education program for hearing impaired children are highlighted The assessment should

include psychological medical audiological and speech and language evaluations conducted by qualified professionals Language programming at the elementary and secondary school levels is discussed with emphasis on the establishment of appropriate goals It is concluded that whatever the reason for placing a hearing impaired student in a regular classroom the task of helping that child move through the difficult process of mastering the English language is a great responsibility RW
