Political Memory and the Aesthetics of Care Mihaela Mihai,2022-01-11 With this nuanced and interdisciplinary work political theorist Mihaela Mihai tackles several interrelated questions How do societies remember histories of systemic violence Who is excluded from such histories cast of characters And what are the political costs of selective remembering in the present Building on insights from political theory social epistemology and feminist and critical race theory Mihai argues that a double erasure often structures hegemonic narratives of complex violence of widespread heterogeneous complicity and of impure resistances not easily subsumed to exceptionalist heroic models In dialogue with care ethicists and philosophers of art she then suggests that such narrative reductionism can be disrupted aesthetically through practices of mnemonic care that is through the hermeneutical labor that critical artists deliver thematically and

formally within communities space of meaning Empirically the book examines both consecrated and marginalized artists who tackled the memory of Vichy France communist Romania and apartheid South Africa Despite their specificities these contexts present us with an opportunity to analyze similar mnemonic dynamics and to recognize the political impact of dissenting artistic production Crossing disciplinary boundaries the book intervenes in debates over collective responsibility historical injustice and the aesthetics of violence within political theory memory studies social epistemology and transitional justice

*Book Traces* Andrew M. Stauffer,2021-02-05 In most college and university libraries materials published before 1800 have been moved into special collections while the post 1923 books remain in general circulation But books published between these dates are vulnerable to deaccessioning as libraries increasingly reconfigure access to public domain texts via digital repositories such as Google Books Even libraries with strong commitments to their print collections are clearing out the duplicates assuming that circulating copies of any given nineteenth century edition are essentially identical to one another When you look closely however you see that they are not Many nineteenth century books were donated by alumni or their families decades ago and many of them bear traces left behind by the people who first owned and used them In *Book Traces* Andrew M Stauffer adopts what he calls guided serendipity as a tactic in pursuit of two goals first to read nineteenth century poetry through the clues and objects earlier readers left in their books and second to defend the value of keeping the physical volumes on the shelves Finding in such books of poetry the inscriptions annotations and insertions made by their original owners and using them as exemplary case studies Stauffer shows how the physical historical book enables a modern reader to encounter poetry through the eyes of someone for whom it was personal
