Sentimental Rules On The Natural Foundations Of Moral Judgement:

Sentimental Rules Shaun Nichols, 2005 *Sentimental Rules* Shaun Nichols, 2004-11-04 *Sentimental Rules* is an ambitious and highly interdisciplinary work which proposes and defends a new theory about the nature and evolution of moral judgment. In it, philosopher Shaun Nichols develops the theory that emotions play a critical role in both the psychological and the cultural underpinnings of basic moral judgment. Nichols argues that our norms prohibiting the harming of others are fundamentally associated with our emotional responses to those harms and that such sentimental rules enjoy an advantage in cultural evolution which partly explains the success of certain moral norms. This has sweeping and exciting implications for philosophical ethics. Nichols builds on an explosion of recent intriguing experimental work in psychology on our capacity for moral judgment and shows how this empirical work has broad import for enduring philosophical problems. The result is an account that illuminates fundamental questions about the character of moral emotions and the role of sentiment and reason in how we make our moral judgments. This work should appeal widely across philosophy and the other disciplines that comprise cognitive science.

Mind and Rights Matthias Mahlmann, 2023-02-16 A uniquely comprehensive analysis of human rights combining historical philosophical and legal perspectives with research from psychology and the cognitive sciences.

Moral Judgments as Educated Intuitions Hanno Sauer, 2022-11-01 An argument that moral reasoning plays a crucial role in moral judgment through episodes of rational reflection that have established patterns for automatic judgment foundation. Rationalists about the psychology of moral judgment argue that moral cognition has a rational foundation. Recent challenges to this account based on findings in the empirical psychology of moral judgment contend that moral thinking has no rational basis. In this book, Hanno Sauer argues that moral reasoning does play a role in moral judgment but not as is commonly supposed because conscious reasoning produces moral judgments directly. Moral reasoning figures in the acquisition, formation, maintenance, and reflective correction of moral intuitions. Sauer proposes that when we make moral judgments we draw on a stable repertoire of intuitions about what is morally acceptable which we have acquired over the course of our moral education. Episodes of rational reflection that have established patterns for automatic judgment foundation. Moral judgments are educated and rationally amenable moral intuitions. Sauer engages extensively with the empirical evidence on the psychology of moral judgment and argues that it can be shown empirically that reasoning plays a crucial role in moral judgment. He offers detailed counterarguments to the anti-rationalist challenge, the claim that reason and reasoning play no significant part in morality and moral judgment, and the emotionist challenge, the argument for the emotional basis of moral judgment. Finally, he uses Joshua Greene's Dual Process model of moral cognition to test the empirical viability and normative persuasiveness of his account of educated intuitions. Sauer shows that moral judgments can be automatic, emotional, intuitive, and rational at the same time.

Collected Papers, Volume 2 Stephen Stich, 2012-07-16 This volume collects the best and most influential essays on knowledge, rationality, and morality that Stephen Stich has

published in the last 40 years All of the essays are concerned in one way or another with the ways in which findings and theories in the cognitive sciences can contribute to and sometimes reshape traditional philosophical conversations and debates A central theme in the essays on epistemology and rationality is the philosophical significance of empirical work on human reasoning done by researchers in the heuristics and biases tradition and by their critics in evolutionary psychology In the essays on morality a wide range of empirical work is explored including studies of the psychological foundations of norms work on the moral conventional distinction and empirical attempts to determine whether humans ever act on altruistic motives Stich was one of the pioneers in the experimental philosophy movement and work in experimental philosophy plays a prominent role in many of these essays The volume includes a new introductory essay that offers an overview of the papers and traces the history of how they emerged

Reason and Emotion in International Ethics Renée Jeffery, 2014-06-12

The study of international ethics is marked by an overwhelming bias towards reasoned reflection at the expense of emotionally driven moral deliberation For rationalist cosmopolitans in particular reason alone provides the means by which we can arrive at the truly impartial moral judgments a cosmopolitan ethic demands However are the emotions as irrational selfish and partial as most rationalist cosmopolitans would have us believe By re examining the central claims of the eighteenth century moral sentiment theorists in light of cutting edge discoveries in the fields of neuroscience and psychology Ren e Jeffery argues that the dominance of rationalism and marginalisation of emotions from theories of global ethics cannot be justified In its place she develops a sentimentalist cosmopolitan ethic that does not simply provide a framework for identifying injustices and prescribing how we ought to respond to them but which actually motivates action in response to international injustices such as global poverty

Psychology of Learning and Motivation , 2009-02-09

This volume presents a variety of perspectives from within and outside moral psychology Recently there has been an explosion of research in moral psychology but it is one of the subfields most in need of bridge building both within and across areas Interests in moral phenomena have spawned several separate lines of research that appear to address similar concerns from a variety of perspectives The contributions to this volume examine key theoretical and empirical issues these perspectives share that connect these issues with the broader base of theory and research in social and cognitive psychology The first two chapters discuss the role of mental representation in moral judgment and reasoning Sloman Fernbach and Ewing argue that causal models are the canonical representational medium underlying moral reasoning and Mikhail offers an account that makes use of linguistic structures and implicates legal concepts Bilz and Nadler follow with a discussion of the ways in which laws which are typically construed in terms of affecting behavior exert an influence on moral attitudes cognition and emotions Baron and Ritov follow with a discussion of how people s moral cognition is often driven by law like rules that forbid actions and suggest that value driven judgment is relatively less concerned by the consequences of those actions than some normative standards would prescribe Iliev et al argue that moral cognition makes use of both rules and consequences and

review a number of laboratory studies that suggest that values influence what captures our attention and that attention is a powerful determinant of judgment and preference Ginges follows with a discussion of how these value related processes influence cognition and behavior outside the laboratory in high stakes real world conflicts Two subsequent chapters discuss further building blocks of moral cognition Lapsley and Narvaez discuss the development of moral characters in children and Reyna and Casillas offer a memory based account of moral reasoning backed up by developmental evidence Their theoretical framework is also very relevant to the phenomena discussed in the Sloman et al Baron and Ritov and Iliev et al chapters The final three chapters are centrally focused on the interplay of hot and cold cognition They examine the relationship between recent empirical findings in moral psychology and accounts that rely on concepts and distinctions borrowed from normative ethics and decision theory Connolly and Hardman focus on bridge building between contemporary discussions in the judgment and decision making and moral judgment literatures offering several useful methodological and theoretical critiques Ditto Pizarro and Tannenbaum argue that some forms of moral judgment that appear objective and absolute on the surface are at bottom more about motivated reasoning in service of some desired conclusion Finally Bauman and Skitka argue that moral relevance is in the eye of the perceiver and emphasize an empirical approach to identifying whether people perceive a given judgment as moral or non moral They describe a number of behavioral implications of people s reported perception that a judgment or choice is a moral one and in doing so they suggest that the way in which researchers carve out the moral domain a priori might be dubious

A Natural History of Natural Theology Helen De Cruz, Johan De

Smedt, 2024-06-11 An examination of the cognitive foundations of intuitions about the existence and attributes of God

Questions about the existence and attributes of God form the subject matter of natural theology which seeks to gain knowledge of the divine by relying on reason and experience of the world Arguments in natural theology rely largely on intuitions and inferences that seem natural to us occurring spontaneously at the sight of a beautiful landscape perhaps or in wonderment at the complexity of the cosmos even to a nonphilosopher In this book Helen De Cruz and Johan De Smedt examine the cognitive origins of arguments in natural theology They find that although natural theological arguments can be very sophisticated they are rooted in everyday intuitions about purpose causation agency and morality Using evidence and theories from disciplines including the cognitive science of religion evolutionary ethics evolutionary aesthetics and the cognitive science of testimony they show that these intuitions emerge early in development and are a stable part of human cognition De Cruz and De Smedt analyze the cognitive underpinnings of five well known arguments for the existence of God the argument from design the cosmological argument the moral argument the argument from beauty and the argument from miracles Finally they consider whether the cognitive origins of these natural theological arguments should affect their rationality
