Negative/Positive Geoffrey Batchen, 2020-12-21 As its title suggests *Negative Positive* begins with the negative a foundational element of analog photography that is nonetheless usually ignored and uses this to tell a representative rather than comprehensive history of the medium The fact that a photograph is split between negative and positive manifestations means that its identity is always simultaneously divided and multiplied The interaction of these two components was often spread out over time and space and could involve more than one person giving photography the capacity to produce multiple copies of a given image and for that image to have many different looks sizes and makers This book traces these complications for canonical images by such figures as William Henry Fox Talbot Kusakabe Kimbei Dorothea Lange Man Ray Seydou Ke ta Richard Avedon and Andreas Gursky But it also considers a number of related issues crucial to any understanding of photography from the business practices of professional photographers to the repetition of pose and setting that is so central to certain familiar photographic genres Ranging from the daguerreotype to the digital image the end result is a kind of little history of photography partial and episodic but no less significant a rendition of the photographic experience for being so This book represents a summation of Batchen's work to date making it be essential reading for students and scholars of photography and for all those interested in the history of the medium

Blum Art Institute, Bard College, 1989 *Uncertain Images: Museums and the Work of Photographs* Dr Sigrid Lien, Professor Elizabeth Edwards, 2014-11-28 Almost all museums hold photographs in their collections and museum professionals and their audiences engage with photographs in a myriad of ways Yet despite some three decades of critical museology and photographic theory and an extensive debate on the politics of representation outside art museums almost no critical attention has been given specifically to the roles purposes and lives of these photographs within museums This book brings into focus the ubiquitous yet entirely unconsidered work that photographs are put to in museums The authors argument is that there is an economy of photographs in museums which is integral to the processes of the museum and integral to the understanding of museums The international contributors drawn from curators and academics reflect a range of visual and museological expertise After an introduction setting out the range of questions and problems the first part addresses broad curatorial strategies and ways of thinking about photographs in museums Shifting the emphasis from curatorial practices and anxieties to the space of the gallery this is followed by a series of case studies of exhibitionary practices and the museum strategies that support them The third section focuses on the role of photographs in the museum articulation of difficult histories A final section addresses photograph collections in a digital environment New technologies and new media have transformed the management address and purposing in photographs in museums from cataloguing practices to streaming on social media These growing practices challenge both traditional hierarchies of knowledge in museums and the location of authority about photographs The volume emerges from PhotoCLEC a HERA funded project on museums and the photographic legacy of the colonial past in a postcolonial and multicultural Europe **The Narratology of Comic Art** Kai Mikkonen, 2017-05-08 By placing comics in a lively dialogue with contemporary narrative theory The Narratology of Comic Art builds a systematic theory of narrative comics going beyond the typical focus on the Anglophone tradition This involves not just the exploration of those properties in comics that can be meaningfully investigated with existing narrative theory but an interpretive study of the potential in narratological concepts and analytical procedures that has hitherto been overlooked This research monograph is then not an application of narratology in the medium and art of comics but a revision of narratological concepts and approaches through the study of narrative comics Thus while narratology is brought to bear on comics equally comics are brought to bear on narratology **Meta Morphing** Vivian Carol Sobchack, 2000 Two thousand years ago Ovid asked his readers to imagine metamorphoses in which men and women became flowers and beasts Today before our cinema savvy eyes people melt and re form as altogether new creatures they morph This volume explores what digital morphing means both as a cultural practice specific to our times and as a link to a much broader history of images of

human transformation Meta Morphing ranges over topics that include turn of the century quick change artists Mesoamerican shamanic transformation and cosmetic surgery recent works such as Terminator 2 Star Trek Deep Space Nine Heavenly Creatures and Forrest Gump and the transformations imagined by Kafka Proust and Burroughs The contributors look not only at the technical wizardry behind digital morphing but also at the history and cultural concerns it expresses
