Horizontal Gene Transfer Mediated Multidrug Resistance: A Global Crisis, 2nd Edition Dongchang Sun, Katy Jeannot, Yonghong Xiao, Charles W. Knapp, 2020-07-16 Throughout history human life has been seriously threatened by bacterial infectious diseases After the discovery of antibiotics humanity thought it had won the fight against infectious bacteria However considering the rapid evolution of bacterial multidrug resistance and exhausted pipeline of antibiotics for fighting bacterial infectious diseases we are approaching the post antibiotic era Unlike eukaryote bacteria are proficient in exchanging their genetic materials with others by means of horizontal gene transfer HGT As a vehicle for antibiotic resistance gene ARG plasmid is self replicable

and transferable in a wide range of host bacteria Moreover ways of HGT mediated ARGs spreading are highly diverse among different species implicating complex evolution routes for the development of multidrug resistance in bacteria In recent years multidrug resistance plasmids have been widely found in bacteria not only from clinical patients but also from animals birds and plants as well as from natural environmental settings including soil and water heralding that the post antibiotic era is much closer than we previously thought The global crisis of multidrug resistance calls for a closer collaboration among people of different professions in different regions countries and continents which will help us recognize the current situation and eventually find effective and long lasting solutions for fighting against infectious bacteria

Advanced Proficiency and Exceptional Ability in Second Languages Kenneth Hyltenstam, 2016-07-25 While the literature on second language acquisition and use is overwhelmingly rich with respect to initial and intermediate stages of development present knowledge of levels of ultimate attainment that are equal or close to that of native speakers has so far not been presented in a coherent manner This is what the present volume aims to achieve In addition to chapters that summarize what is currently known about the grammatical lexical and discourse features that continue to exhibit instability at the most advanced levels of second language development the volume presents overviews of the incipient research on two unique learner populations polyglots and employees in international call centres Polyglots defined as language users who are proficient in six or more second languages may be considered second language learners par excellence Call centre employees in economically less developed parts of the world are intriguing in how they cope with the high language proficiency requirements of their job In conclusion this book is relevant for all readers both professionals and students interested in the development of second language theory For language teachers the book provides insights that are profitable in classrooms for advanced learners
