Popular Visual Shows 1800-1914 Joe Kember, John Plunkett, 2025-04-23 This book tells the story of the growth of picturegoing as a popular habit between 1800 and 1914. Encouraged by urbanisation and changes in transportation, education and leisure patterns, the regular and widespread provision of exhibitions and shows became a defining characteristic of cultural life. Painted panoramas and dioramas awed with enormous tableaux; the stereoscope immersed viewers in a 3D world; the many varieties of peepshow promised a marvellously garish experience of patriotic battles, gruesome murders and far off places. If that was not enough, the ever versatile magic lantern projected hundreds of thousands of slides of every imaginable subject from travelogues and temperance tales to illustrated hymns and adaptations of popular fiction. Then, after 1896, audiences experienced the cinematograph and were able to enjoy film at the many fixed venue cinemas that emerged from around 1908. Moving and projected images were displayed not only in town halls, theatres and other large exhibition spaces but also in workhouses, schools, churches, empty shops and fairgrounds. Picturegoing in all its variety became a national pastime, integrating itself more and more pervasively into the structures of everyday life as the nineteenth and early twentieth centuries progressed. Drawing on a wealth of new evidence, this book details the shows that were on offer, where and what they were, the networks and infrastructure they existed within and above all, how their audiences experienced them

The long awaited final volumes of Emerson's lectures. The past several decades have witnessed an extraordinary editorial reconstruction of the life and influence of Ralph Waldo Emerson, one of America's foremost writers and intellectuals. By drawing primarily from previously unpublished manuscripts in the Ralph Waldo Emerson Memorial Association Collection in the Houghton Library at Harvard University, recent editions of Emerson's correspondence, journals and notebooks, sermons and early lectures have provided authoritative texts that inspire readers to consider Emerson's place in American culture afresh. Drawn from the last untapped body of Emerson's manuscripts, *The Later Lectures of Ralph Waldo Emerson 1843-1871* presents the texts of forty-seven complete and unpublished lectures that Emerson delivered during the crucial middle years of his career. They offer Emerson's thoughts on subjects that occupied him throughout his life: New England and Old World history and culture, poetic theory, education, the history and uses of intellect, as well as his ideas on subjects that sparked as many debates in the nineteenth century as they do today: race relations and women's rights.
