Family Psychoeducation for Serious Mental Illness Harriet P. Lefley,2009-07-17 Research shows that many adults with serious mental illness live with or maintain contact with their families But families are rarely given information about their relative s illness and their own needs for support are ignored To be optimally beneficial family members and other caregivers need education about the disorder some knowledge of illness management techniques and personal support Family psychoeducation FPE is a powerful evidence based psychosocial intervention that serves consumers and their families FPE has proven efficacious in reducing relapse and hospitalization reducing symptoms increasing employability of persons with severe and persistent mental illness and in many cases enhancing their families well being Its success rests with a state of the art education model for improving caregivers understanding of their loved one s illness through learning what is known and not known about it and how to assess and cope with its manifestations Here in the first book of its kind Harriet P Lefley traces the history of FPE including the developments in mental health services and systems and theoretical approaches that inform it and the robust empirical evidence it now

claims after a quarter century of development and evaluation at major research centers around the world Presenting first the approach s generic components training models and required competencies Lefley then discusses the available variations such as Family Education FE a brief manualized form of FPE offered by professionally trained family members that has some empirical support for knowledge gains and easing family distress The result is a comprehensive practical introduction to family psychoeducation that critically appraises the evidence and examines the model s place in contemporary mental health systems This groundbreaking volume is an ideal training tool for graduate students of social work psychology and psychiatry and a valuable addition to the clinician s armamentarium of evidence based practices for clients with serious mental illness

Trauma and Serious Mental Illness Steven N. Gold, John D. Elhai, 2018-10-24 An exploration of the newfound connections between mental illness and trauma For decades the idea that serious mental illnesses SMIs are almost exclusively biologically based and must be treated pharmacologically has been commonplace in psychology literature As a result many mental health professionals have stopped listening to their clients categorizing their symptoms as manifestations of neurologically based disturbed thinking Trauma and Serious Mental Illness is the groundbreaking series of works that challenge this standard view and provides a comprehensive introduction to the emerging perspective of SMIs as trauma based This unique collection illustrates how different psychotherapy approaches can lead to reduced symptomatology decreased psychological distress and improved functioning in individuals living with SMIs Each extensively referenced chapter in Trauma and Serious Mental Illness offers mental health workers a forward looking theoretical inquiry empirical study or critical treatise providing compelling counter evidence to challenge the widespread belief that SMIs are not reactions to the extreme and extremely disturbing circumstances embodied by psychological trauma In addition to the etiological application this revealing text proposes ways to incorporate this cutting edge approach toward treatment options as well Contributors to Trauma and Serious Mental Illness suggest that childhood trauma is related to psychotic disorders dissociation can be confounded with psychotic symptoms auditory hallucinations can be diagnostic of dissociation rather than psychosis psychosis is related to the quality of family of origin environment and to age of onset of childhood abuse bipolar and trauma related disorders sometimes overlap individuals with SMIs suffer related trauma even in treatment facilities and much more Trauma and Serious Mental Illness is an eye opening resource for mental health professionals psychologists counselors psychiatrists social workers trauma workers and educators and students in these disciplines

recommendations on the provision of lifestyle interventions These lifestyle oriented interventions consisting of behavioral educational and psychological components have been conducted mainly in research settings and have shown a good impact on patients physical health Despite this their feasibility in routine settings has not been tested yet It seems to be clinically and ethically relevant to develop validate and carry out interventions to improve the lifestyle s behaviors of patients with severe mental disorders to reduce the presence of comorbidities and to improve their life expectancy In this Research Topic we will summarize the available knowledge of the efficacy and effectiveness of psychosocial interventions aimed at improving healthy lifestyle behaviors and promoting the physical health of patients with severe mental disorders Total number of articles 19
