systems and some form of resistance training to keep their muscles strong With regard to diet they have been told to restrict or omit macronutrients such as fats and carbohydrates and lots of other advice with regard to calorie counting Could it be that this information however well intended was mistaken And is it really necessary to devote so much time to the pursuit Fitness researcher and pioneer John Little has spent more than twelve years researching the actual science underpinning our most prevalent beliefs about exercise and has come away from the enterprise convinced that we need an entirely new paradigm one that would involve reliance on briefer workouts He presents this revolutionary new approach in *The Time Saver's Workout* Among the fascinating revelations presented in this book Certain types of exercise can actually make you less healthy and fatter Taking large doses of food supplements might actually shorten your life and put you at greater risk for disease Stretching to become more flexible or to recover quicker from injury has been found to do neither of these things Resistance training once considered to be the weak sister of exercise is now looking like the best form of exercise one should engage in The new protocols that Little exposes offer a far safer alternative for those looking to become stronger fitter and healthier without spending their lives in the gym

The New Rules of Lifting for Women Lou Schuler, Cassandra Forsythe, PhD, RD, Alwyn Cosgrove, 2008-12-26 In *The New Rules of Lifting for Women* authors Lou Schuler Cassandra Forsythe and Alwyn Cosgrove present a comprehensive strength conditioning and nutrition plan destined to revolutionize the way women work out All the latest studies prove that strength training not aerobics provides the key to losing fat and building a fit strong body This book refutes the misconception that women will bulk up if they lift heavy weights Nonsense It's tough enough for men to pack on muscle and they have much more of the hormone necessary to build muscle natural testosterone Muscles need to be strengthened to achieve a lean healthy look Properly conditioned muscles increase metabolism and promote weight loss it's that simple The program demands that women put down the Barbie weights step away from the treadmill and begin a strength and conditioning regime for the natural athlete in every woman *The New Rules of Lifting for Women* will change the way women see fitness nutrition and their own bodies
