The Beginning and the End Clément Vidal, 2014-05-16 In this fascinating journey to the edge of science Vidal takes on big philosophical questions Does our universe have a beginning and an end or is it cyclic Are we alone in the universe What is the role of intelligent life if any in cosmic evolution Grounded in science and committed to philosophical rigor this book presents an evolutionary worldview where the rise of intelligent life is not an accident but may well be the key to unlocking the universe's deepest mysteries Vidal shows how the fine tuning controversy can be advanced with computer simulations He also explores whether natural or artificial selection could hold on a cosmic scale In perhaps his boldest hypothesis he argues that signs of advanced extraterrestrial civilizations are already present in our astrophysical data His conclusions invite us to see the meaning of life evolution and intelligence from a novel cosmological framework that should stir debate for years to come *Index to Media and Materials for the Mentally Retarded, Specific Learning Disabled, Emotionally Disturbed*
