Long Waves Of Regional Development:

Long Waves of Regional Development Michael Marshall, 1985 **Long Waves of Growth, Hegemonic Power, and Climate Change in the World Economy** Phillip Anthony O'Hara, 2025-10-02 This book investigates eras of major geopolitical and socioeconomic power development relative demise and potential renewal for four major political economies. It concentrates on the Dutch Golden Age of the late 1500s and 1600s, British hegemony of the 1800s, Pax Americana of the 1900s, and Chinese potential hegemony of the 2000s, as well as long wave patterns of change over successive centuries to the present and to some degree into the future. Dutch, British, US, and Chinese economies are situated within patterns of long term successive rise and fall and fall and rise of economic growth, hegemony, and climate change in the world political economy, including linkages between core, periphery, and semi periphery. Patterns of multiple crises tend to appear in between hegemonic periods, and climate change often undergoes complex dynamics through time while currently climate anomalies are emerging during mostly long wave downswings and polycrises in the world economy. Contemporary themes of the book include the ongoing competition for world domination between the US and China, the conflict over Ukraine, Taiwan, that some think may generate world war 3, the climate change crisis that continues to plague the world, and whether the world and its major economies are likely to undergo a Golden Age into the future. Chapter 7 of this book on US hegemony and long waves includes extracts of material that won the Myrdal Prize for Book of the Year Prize from EAEPE, as well as Journal Article of the Year from Curtin Business School. Ideas from parts of Chapter 9 emanate from a volume that won Book of the Year Award from CBS. A climate change paper that won Journal Article of the Year Awards from EAEPE and CBS informed ideas that are used in several parts of this book. The book outlines key stylized facts from the analysis and presents hypotheses for further investigation on the relationship between long term growth, hegemony, and climate change. The book uses the work of Kondratiev, Schumpeter, and company, themes in economic history, modern political economy schools, and the principles of political economy contingency paradigm to reformulate long wave hegemony and climate change hypotheses and empirics.

Local and Regional Development Andy Pike, Andrés Rodríguez-Pose, John Tomaney, Andrés Rodríguez-Pose, 2006-11-22 Local and regional development is an increasingly global issue. What are the conceptual and theoretical frameworks capable of understanding and interpreting local and regional development? What are the main policy interventions and instruments? How do localities and regions attempt to effect development in practice? What kinds of

America's Johannesburg Bobby M. Wilson, 2019-12-01 In some ways no American city symbolizes the black struggle for civil rights more than Birmingham Alabama During the 1950s and 1960s Birmingham gained national and international attention as a center of activity and unrest during the civil rights movement Racially motivated bombings of the houses of black families who moved into new neighborhoods or who were politically active during this era were so prevalent that Birmingham earned the nickname Bombingham In this critical analysis of why Birmingham became such a national flashpoint Bobby M Wilson argues that Alabama's path to industrialism differed significantly from that of states in the North and Midwest True to its antebellum roots no other industrial city in the United States depended as much on the exploitation of black labor so early in its urban development as Birmingham A persuasive exploration of the links between Alabama's slaveholding order and the subsequent industrialization of the state America's Johannesburg demonstrates that arguments based on classical economics fail to take into account the ways in which racial issues influenced the rise of industrial capitalism
