Look Out By Water:

Look Out by Water Helena Ramsay, 2003 *Look Out by Water* is a no nonsense book with a strong safety message for young children about how they should avoid potentially dangerous situations near water. The narrative throughout is in simple straightforward language which is undramatic and reassuring whilst stressing the dangers that seemingly familiar situations can hold for children. A mixture of running narrative and speech bubbles has been specially developed in association with the National Centre for Language and Literacy Reading Centre to draw in both confident and less able readers. Specially commissioned photographs are combined with child centred artwork to support the text and reiterate the safety message.

Frogs Out Of Water BJ Stuart, 2012-05-21 Autumn equinox is the time for all adolescent frogs to leave the water. Big Banjo glared down at Lito ade in complete surprise. Towns are polluted. That's where people live. Why on earth would you go there? Lito ade spelled it out: I WANT TO SEE THE LAND OF DOUBLE GOLDEN RAINBOWS. There comes a time where every adventurer must travel, learn and bring home knowledge of the land and its peoples so that future generations of frogs may live and grow in peace and harmony. Join two frog friends each on his own quest as they journey through the waterways of South West Western Australia. Along the way you will meet many local Indigenous characters as each frog strives toward his ultimate goal. And so begins the most extraordinary amphibian adventure.

Irrigation Systems Adrian Laycock, 2007-01-01 Of all the confrontations man has engineered with nature, irrigation systems have had the most widespread and far reaching impact on the natural environment. Over a quarter of a billion hectares of the planet are irrigated and entire countries depend on irrigation for their survival and existence. Considering the importance of irrigation schemes, it is unfortunate that until recently the technology and principles of design applied to their construction has hardly changed in 4 000 years. Modern thinking on irrigation engineering has benefited from a cross fertilization of ideas from many other fields including social sciences, control theory, political economics and agriculture. However, these influences have been largely ignored by irrigation engineers. Drawing on almost 40 years of experience of irrigation in the developing world, Laycock introduces new ideas on the design of irrigation systems and combines important issues from the disciplines of social conflict management and political thinking.
