Looking At Architecture:

A Philosopher Looks at Architecture Paul Guyer, 2021-05-20 What should our buildings look like Or is their usability more important than their appearance Paul Guyer argues that the fundamental goals of architecture first identified by the Roman architect Marcus Pollio Vitruvius good construction functionality and aesthetic appeal have remained valid despite constant changes in human activities building materials and technologies as well as in artistic styles and cultures Guyer discusses philosophers and architects throughout history including Alberti Kant Ruskin Wright and Loos and surveys the ways in which their ideas are brought to life in buildings across the world He also considers the works and words of contemporary architects including Annabelle Selldorf Herzog and de Meuron and Steven Holl and shows that despite changing times and fashions good architecture continues to be something worth striving for This new series offers short and personal perspectives by expert thinkers on topics that we all encounter in our everyday lives **Looking Around** Witold Rybczynski, 1993 An inspired engaging look at what architecture is and how we live and work in it by the acclaimed author of *Home* and *The Most Beautiful House in the World* Rybczynski discusses buildings like the Wexner Center for the Visual Arts demonstrates how architecture actually works and more **Architects Make Zigzags** Diane Maddex, 1986-08 An alphabet book of twenty six architectural concepts with drawings and definitions of such terms as dormer facade and newel post

advocates a way of looking that blends sensory perception formal analysis social and political consciousness and personal memory Focusing special attention on the aesthetic concept of the figure ground problem the author challenges this foundational principle s presumed hierarchies and shows how a new and more dynamic understanding of it can enhance our way of looking at and understanding art and architecture Works discussed in the book include a wide range of contemporary and historic art and architecture among them artworks by Rembrandt Matisse Eva Hesse and David Hammons architecture by Zaha Hadid Peter Zumthor and Weiss Manfredi and non Western works such as a thirteenth century Chinese vase and the Ry anji dry garden in Kyoto Japan Personal and engaging this book is for a wide audience of those practicing studying or with an interest in the creative fields from beginners to seasoned professionals Archi-Graphic Frank Jacobus,2015-10-27 This informative and engaging book uses a variety of inventive infographics to take an unusual look at architecture in a way that would not be possible with words and images alone Through a variety of different infographics it compares for example the range of materials and colours used by different architects the relative locations of their buildings who influenced who and which architects are the most discussed It also approaches architecture from more unconventional angles with spreads that show the kinds of architecture favoured by dictators the networks of love affairs that architects got entangled in the defining facial features of famous architects and so on Irreverent and entertaining this book will appeal to all those with an interest in architecture or infographics *Introduction to Looking at Architecture* Baltimore Museum of Art. understand the cultural significance of the buildings that surround us. It avoids the traditional style spotting approach in favour of giving an idea of what it is about buildings that moves us and what it is that makes them important artistically and culturally. The book begins by looking at how architecture acquires meaning through tradition and concludes with the exoticism of the recent avant garde. Illustrations of particular buildings help to anchor the general points with specific examples from ancient Egypt to the present day.

Why Architecture Matters Paul Goldberger, 2009-11-03

Why Architecture Matters is not a work of architectural history or a guide to the styles or an architectural dictionary though it contains elements of all three. The purpose of *Why Architecture Matters* is to come to grips with how things feel to us when we stand before them with how architecture affects us emotionally as well as intellectually with its impact on our lives. Architecture begins to matter writes Paul Goldberger when it brings delight and sadness and perplexity and awe along with a roof over our heads. He shows us how that works in examples ranging from a small Cape Cod cottage to the vast flowing Prairie houses of Frank Lloyd Wright from the Lincoln Memorial to the highly sculptural Guggenheim Bilbao and the Church of Sant Ivo in Rome where simple geometries create a work of architecture that embraces the deepest complexities of human imagination. Based on decades of looking at buildings and thinking about how we experience them the distinguished critic raises our awareness of fundamental things like proportion, scale, space, texture, materials, shapes, light and memory. Upon completing this remarkable architectural journey readers will enjoy a wonderfully rewarding new way of seeing and experiencing every aspect of the built world.
