Resumen

Algunos investigadores sobre las asociaciones florísticas del Cretácico en México, crearon un panorama más completo de la flora en ese momento y de su evolución hasta la actualidad. Los autores revisan paleobotánicos contemporáneos existentes para el Cretácico basados estrictamente y no restringidos a estudios de microfósiles en Coahuila, Chiapas y Puebla, y los de fragmentos de fósiles en Colima y Sonora y algunos paleoetnobotánicos realizados en los estados de Baja California, Durango y Michoacán. La falta de la mayoría de datos para este período se debe principalmente a que en este tiempo la mayor parte de México perteneció a las Américas. Sin embargo, con los numerosos los trabajos de flora fossil conducted en el Cretácico basados principalmente en la Formación Osmán (Coahuila), y un menor medida, por revisiones de las formaciones Cerro del Peñón (Coahuila), El Cofre (Baja California), Sierra Madre (Chiapas), Tuxtepec, Grupo Colima (Chiapas) y otros trabajos estudios florísticos. En esta síntesis revisamos los trabajos sobre datos paleobotánicos de gran relevancia del Cretácico de México, incluyendo información del Cretácico en la localidad de El Chango (Chiapas) y registros de macro y microfósiles en la localidad de Huapaco en la Sierrita de Colima (Sonora).

Palabras clave: Paleobotánica, paleoetnobotánica, Cretácico, México.

Abstract

Some investigators of Cretaceous floristic assemblages in Mexico created a more complete picture of the flora at that time and its evolution up to the present. The authors reviewed paleobotanical studies for the Early Cretaceous, mainly unpublished and not restricted to microfossil studies in Coahuila, Chiapas and Puebla, and some of fragments of fossils in Colima and Sonora and some paleoethnobotanical works in the states of Baja California, Durango and Michoacán. The reason for the paucity of data for this period is mainly due to the fact that at that time most of Mexico remained unexplored. In contrast, paleobotanical studies focused on the Early Cretaceous are more numerous and are mainly centered on the Osmán Formation (Coahuila) and, to a lesser extent, there are studies from the Cerro del Peñón (Coahuila), El Cofre (Baja California), Sierra Madre (Chiapas), and Tuxtepec (Chiapas) formations, the Colima Group (Chiapas) and other isolated unpublished works. Here we revise the Cretaceous of Mexico (as provided, mainly by contemporary microfossils from the locality of El Chango (Chiapas) and new macro- and microfossil records from Huapaco in Colima (Sonora).

Keywords: Paleobotany, paleoethnobotany, Cretaceous, Mexico.
