S.T.KRISHNEKUMAAR, Dr. K.S.MEENAKSHI SUNDARAM, **American Book Publishing Record**, 1997 **Managing Financial Institutions** Elizabeth Cooperman, 2016-12-08 This book goes beyond traditional financial institutions textbooks which tend to focus on mathematical models for risk management and the technical aspects of measuring and managing risk. It focuses on the role of financial institutions in promoting social and economic goals for the communities in which they operate for the greater good while also meeting financial and competitive challenges and managing risks. Cooperman divides the text into seven easily teachable modules that examine the real issues and challenges that managers of financial institutions face. These include the transformative changes presented by social unrest, climate change, and resource challenges, as well as the changes in how financial institutions operate in light of the opportunities that rapid innovations and disruptive technologies offer. The book features up-to-date coverage of new regulations affecting financial institutions such as Dodd-Frank and new SEC regulations. Material on project financing and new forms of financing, including crowd-funding and new methods of payment for financial institutions. New sustainable finance models and strategies that incorporate environmental, social, and corporate governance considerations. A new chapter on sustainable financial institutions, social activism, the greening of finance, and socially responsible investing. Practical cases focusing on sustainability give readers insight into the socioeconomic risks associated with climate change. Streamlined and accessible. **Managing Financial Institutions** will appeal to students of financial institutions and markets, risk management, and banking. A companion website featuring PowerPoint slides, an Instructor's Manual, and additional cases is also available. *Prep Pak for Flmi 371* Sean Schaeffer Gilley, 1996 *Digitalisation, Sustainability, and the Banking and Capital Markets Union* Lukas Böffel, Jonas Schürger, 2022-12-30 This book covers three topics that have dominated financial market regulation and supervision debates: digital finance, sustainable finance, and the Banking and Capital Markets Union. Within the first part, seven chapters will tackle specific questions arising in digital finance, including but not limited to artificial intelligence, tokenisation, and international regulatory cooperation in digital financial services. The second part addresses one of humanity's most pressing issues today: the climate crisis. The quest for sustainable finance is driven by political actors and a common understanding that climate change is a severe threat. As financial institutions are a cornerstone of human interaction, they are in the regulatory spotlight. The chapters explore sustainability in EU banking and insurance regulation, the interrelationship between systemic risk and sustainability, and the greening of EU monetary policy. The third part analyses two projects that have led to huge structural changes in the European financial market architecture over the last decade: the European Banking Union and the Capital Markets Union. This transformation has raised numerous legal questions that can only gradually be answered in all their intricacies. In four chapters, this book examines composite procedures, property rights of depositors in banking resolution, preemptive financing arrangements, and the phenomenon of subsidiarisation in the context of Brexit. Of interest to academics.
